Subject: Emerging Contaminant Scoping Statement - WI DOT Old Dutchmill - BRRTS # 03-20-183944

Good Morning Joe,

DNR is requesting an update on the status of the Emerging Contaminant (EC) scoping statement. As stated below, DNR needs further clarification regarding the EC scoping evaluation in order to review. Please respond by October 19, 2021, with the requested information or a date within the next month (by November 5th, 2021) that you anticipate this will be submitted. Once this and any resulting subsequent actions requested by DNR have been completed, DNR will proceed with the closure process and issue the Final Closure letter. Should you have any questions or concerns please let me know. Thank you.

Sincerely,
Andy James

Subject: Emerging Contaminant Scoping Statement - WI DOT Old Dutchmill BRRTS No. 03-20-183944

Good Morning Joe,

Could you please provide further clarification regarding the Site use and history, type of release and how it was determined not to sample for PFAS or other emerging contaminants in addition to the information you have below?

Thanks,
Andy James

Subject: PFAS Scoping Statement - Old Dutch Mill (BRRTS No. 03-20-183944)

Andy:

Based upon information collected during the Site Investigation Report dated June 28, 2019, the petroleum contamination was confirmed during site assessment activities performed in the early 1990s. Previously, the subject property was operated as a gasoline station by the current owners family (Ostrander). Upon completion of the UST removal and subsequent site assessment, the subject property is now utilized as a private residence.

On March 6, 2021, Endeavor representative (Joseph Ramcheck) conducted a telephone interview with the current property owner representative (Tracy Ostrander). Ms. Ostrander indicated that, to the best of her knowledge, the subject property never stored, used, handled or deployed perfluoroalkyl and polyfluoroalkyl substances at the subject property.

Please let me know if there are any questions or if you require additional information.

Regards,
Joe
