About the only ones I would add are due south at the intersection of Division & Hwy G. But I'm only going by what I can see on googlemaps. Otherwise . . . carry on.

We are committed to service excellence.

Subject: FW: Arlene's Inn

See Gina's note below "I will provide a map and address of the homes/businesses when you are ready to sample". Here is a list I came up with for the six private wells to be sampled:

Don Tiemon – New Private Well at [N8649 CTH G](#)

Arlene's Inn – Private Well at [N8631 CTH G](#)

Town of Hendren – Private Well at [W8107 Main St](#) (if well exists and occupied)
Owners of former bank property to the north and own entire block.

Thomas M. Holmgren – Private Well at [W8123 Foster St](#) (if well exists and occupied)
Neighbor directly to the west

James Kosick – Private Well at [W8127 Foster St](#) (if well exists and occupied)
Neighbor two properties to the west

Eloa Vollrath – Private Well at [N8628 CTH G](#) (if well exists and occupied)
Neighbor directly east of Arlene's Inn

If you have a couple other possibilities in case some of these wells are inactive/or property is not occupied let us know. Please feel free to modify how you see fit.

We will also be planning to conduct up 3 SSVS locations within the Arlene's Inn building located at N8631 CTH G.

Any questions let me know.
Thanks,

Jason Powell

Subject: Arlene's Inn

Jason,

Ron asked me to provide you with the number of potable wells to be sampled and the number of vapor sampling ports for you to determine the costs you need to submit for approval under PECFA. If Arlene's Inn is 5000 feet or greater, 3 sample ports need to be completed; if it is less than 5000 square , it would be a maximum of 2 ports (depending on the area).

With regards to the number of potable wells, it will be a maximum of 6 wells. It is likely that it might be less, as many houses in Willard are not inhabited. I will provide you a map and address of the homes/businesses when you are ready to sample.

Don't hesitate to contact me if you have any questions.

Thanks.
