Change Order Request - Private Well Sampling, Closure Request Re: Former Tosch Motors Property, Rudolph, WI PECFA # 54475-9999-55, WDNR # 03-72-000049

Dear Tom:

In response to your phone call on May 4, 2017, MSA is submitting this change order request for the following scope of work. It is my understanding that based on your meeting with the DNR closure committee on May 4th, they are requesting a groundwater sample from the private water supply well at 1617 Main Street prior to preparing a closure request for the site. If there are no significant detects in the groundwater sample, MSA will proceed with preparation of the case closure request for the site.

The scope of work includes:

- 1. Prepare a request for access to the 1617 Main Street property (Mrozek property) to collect a water sample.
- 2. Once authorization to proceed has been granted by the property owner, and contact information for the renter has been obtained, MSA will collect the sample, and analyze it for PVOCs+1,2DCA.
- 3. Sample results will be submitted to you for your review and approval to proceed with preparation of the closure request.
- 4. Upon your approval to proceed, a closure request will be prepared for the property.
- 5. It is my understanding that at least two GIS packets will be prepared, one including all of the parcels owned by Jim Simonis on the south side of Main Street (due to a groundwater plume exceeding enforcement standard concentrations for at least a portion of each of these parcels) and one for the right of way of Main Street adjacent to the former tank bed (Village of Rudolph). It is possible that a GIS packet will also need to be sent to Wood County if it is determined upon a review of the soil and groundwater data that the contamination in the right of way of Main Street also affects the area of the right of way controlled by the County. Therefore I have included a request for three GIS packets with the understanding that the third one will only be billed if determined to be necessary.
- 6. I have also included one change order request for our recent correspondence and discussion to determine the scope of work and preparation of this document.

The attached U&C spreadsheet outlines the items included in this change order request. The total amount of the change order request is \$5,180.85.

Subject:	Tosch Motors - change order addition

Hi Tom,

I called Ken Hill this afternoon and discussed the two options for dealing with the remaining soil contamination under the building at the Tosch Motors site. Option 1 – treat the building as an impervious surface, capping the contamination, preventing direct contact with the soil and infiltration to groundwater. Would require annual reporting to confirm the building is still there and functioning as a cap, replacement of the building if demolished with an equivalent impervious surface (either pavement or a new building). Option 2 – Identify the building as a structural impediment to a complete investigation. Would not require any annual reporting, but would require investigation and potentially additional remediation (excavation) when the building was removed.

After discussion of the options, Ken recommended Option 1 on behalf of his client Jim Simonis. Based on this, MSA is requesting an addition to the May 8, 2017 change order request for this site to include U&C task 35, Cap Maintenance Plan, for an amount of \$320.04.

Upon this change order approval, MSA will include a cap maintenance plan for the building as an impervious surface in the case closure request for the DNR's review and (hopefully) approval.

Please contact me with any questions.

Thanks, Jayne
