- Sampling was conducted on September 20, 2007 (Mueller used the phrase "exactly two weeks ago").
- Environmental Management Company (EMC) conducted the sampling.
- Mueller was promised results by last week but expects he will receive results the week of October 8, 2007.
- Mueller stated he would forward results to the Department when he receives them.
- Mueller contacted another firm for an estimate and that estimate was significantly higher than EMC's.
- EMC sampled the outside wells and the wells inside the building.
- Re EMC's qualifications, Mueller said that EMC was to have sent something to Easterly.
- Mueller alluded to EMC advising of not needing to conduct further monitoring based on what is found.
