Subject: Introduction of DNR Vapor Intrusion Investigation - Oakfield Properties, BRRTS #02-20-202649

Miriam,

Thanks for speaking with me this afternoon. As discussed, DNR is continuing the next phase of environmental investigation work regarding contamination at 201 North Main Street, known as "Oakfield Properties". Today we are sending introductory letters to five residential property owners with request for access for our environmental consultant, The SIGMA Group, to sample the air within and beneath their homes for chemical vapors. The addresses are 213 North Main Street, 106, 116 & 206 East Church Street and 185 North First Street. I will email you a PDF of the letters when available.

Part of the investigation includes sampling the air within the sanitary sewers. Our staff will reach out to Earl to coordinate this work.

As we proceed with this phase of the investigation, please feel free to contact me or Rob Hoverman, our DNR Vapor Intrusion Expert that will be overseeing this investigation. Rob is copied on this email. You can view additional information for this site on our electronically available database, Bureau for Remediation and Redevelopment Tracking System (BRRTS) on the Web (BOTW) at the following link for this specific site: [WDNR EM/RR BOTW \(wi.gov\)](http://dnr.wi.gov/BOTW)

Thanks again for your time.

We are committed to service excellence.

Visit our survey at <http://dnr.wi.gov/customersurvey> to evaluate how I did.

Jennifer Borski
