Subject: Tank Closure Remedial Investigation, Eau Claire Water  
Treatment Plant, Riverview Drive, Eau Claire

Dear Dale:

The Department has recently reviewed a report concerning the remedial investigation of the petroleum contamination that was discovered in November during a tank removal at the Eau Claire Water Treatment Plant.

Based upon the results submitted by your consultant, Ayres Associates, it appears that any petroleum contamination present has been effectively removed or reduced to non-detectable levels. In concurrence with your consultants recommendations, the department feels that no further actions are required at this time.

Attached is the approved *Application to Treat or Dispose of Petroleum Contaminated Soil*. Thank you for your cooperation in addressing this problem. If you have any questions, please feel free to call me at (715) 839-2906.

Sincerely,

A handwritten signature in cursive script that reads "Matt Hostak".

Matt Hostak  
Environmental Specialist
