Hi Jason:

I am approving your request for \$1,129.60 for Task 5/Activity Code CR30 for the PE review and certification of the closure packet. I will make a note in the Comments section of the January 22, 2019 cost request approval in Tracker. Please include a copy of this email with your claim.

Let me know if you have any questions.

**We are committed to service excellence.**

Visit our survey at <http://dnr.wi.gov/customersurvey> to evaluate how I did.

Chris Saari

Chris, we will also need to have the 5/CR20 Professional Engineer Review and Certification of the Closure Request (\$1,129.60) approved if we can submit for "closure" at this time as it was not required when we submitted the last cost estimate. Just an email approval and note in Tracker is okay with us. Thanks,

**Jason Powell**

Chris, not sure if you are managing this one after Ralph left but attached are the SSVS & GW results from the 3/21/19 sampling event.

The SSVS results showed no exceedences of the VAL's for the source property building (2 sample locations) and the neighboring daycare building (1 sample location).

The groundwater results appear to be at least stable to even decreasing. Please note that we could not locate monitoring wells MW-4 & MW-9 (both have been historically clean) as they were under 2-7 feet of snow. Monitoring well MW-7 (clean the two previous rounds) appears to have been destroyed (likely hit with snow plow) and the on-site private well could not be sampled as the electricity has been shut off to the building.

Based on these results, can we go ahead and proceed with the closure request which we have costs approved for?

Thanks,

**Jason Powell**
