Subject: G. Hannan site

Hi Vicki,

RE: BRRTS #03-38-204911 - G & D Mobil

Thank you for providing sampling data for the biopile at the George Hannan property in the Town of Grover. In your letter, you requested that I determine whether the soil pile could be spread out on the field where it is currently stored. In review of the information provided, I will need additional sampling to make such a determination. Please obtain 2 additional samples from the soil pile, and complete lab analysis for PAH compounds. Also analyze for lead on one sample.

Upon approval for spreading the soil, I may request that the soil around and beneath the pile be sampled. While the pile sits on a plastic sheet, it has not been covered for some time and I am concerned that petroleum compounds may have been introduced into a previously uncontaminated location.

Further, I believe that spreading this soil in the future would make the field a "landspread site"; thus, the rules following closure of a landspread site (no crops for human consumption, etc.) might be applicable.

If you or Mr. Hannan have any questions, please give me a call.

Thanks -
~ Cathy
