RE: Site Status Report  
D&G Mobil & Quickmart, 125 US Hwy 141, Coleman, Wisconsin  
WDNR BRRTS #03-38-204911; Commerce #54112-9792-35

Dear Ms. DuFresne:

On behalf of Mr. George Hannan, responsible party for the D&G Mobil & Quickmart LUST site, Bay Environmental Strategies, Inc. (BAY) is providing a Site Status Report to document the site activities associated with the Site Investigation Work Plan submitted on November 28, 2007.

The following enclosures are included as supporting documentation:

- Figure 1, Site Detail Map
- Table 1, Soil Analytical Results
- Table 2, Groundwater Analytical Results
- Laboratory Report for January 2008 Sampling Activities
- Soil Boring Logs for January 2008 Sampling Activities

#### **PROJECT BACKGROUND**

Site history was provided in the above-referenced Site Investigation Work Plan. The work plan included the following:

- Installing a minimum of four temporary wells via Geoprobe<sup>®</sup> and collection of two or three soil samples per boring. The soil samples were to be submitted for laboratory analysis of gasoline range organics (GRO) and petroleum volatile organic compounds (PVOCs).
- Collection of groundwater samples and submittal of GRO and PVOCs.
- Submittal of report documenting results.

The following comments regarding the work plan were provided by the WDNR:

- Elimination of GRO analysis and addition of polycyclic aromatic hydrocarbons (PAHs) for both soil and groundwater samples.
- Identify the location of the soil pile generated during removal of the tanks and previous remedial activities.
- Documentation related to the presence or abandonment of monitoring well MW-1.

### **SITE ACTIVITIES**

On January 7, 2008, four soil borings (SB-1 through SB-4) were installed. Boring SB-4 was installed within the former tank bed and borings SB-1 through SB-3 beyond the former tank bed. Each boring was advanced via Geoprobe<sup>®</sup> by SGS, Inc., Merrill, Wisconsin. The borings were advanced to depths ranging from 12 to 14.5 feet below grade---the apparent depth of bedrock in the area. Three soil samples were collected from borings SB-1 through SB-3; one from 2 to 4 feet, one from 9 to 10 feet (field estimated groundwater depth), and one at the bottom of the boring. Samples were submitted prepared and submitted to Northern Lake Service Inc., Crandon, Wisconsin, for PVOC and PAH analysis.

One-inch temporary wells were installed at the time of soil sampling. Groundwater water samples were collected on January 15, 2008. No samples were collected from SB-4 due to lack of water within the well column.

The location of MW-1 was identified using a metal detector during the groundwater sampling activities. A groundwater sample was not collected from MW-1.

### ***Subsurface Conditions***

Soils were generally identified as silty clay in borings SB-1 through SB-3. The soil column in SB-4 consisted of a silty sand backfill. Each boring was advanced as deep as possible, indicating the potential presence of bedrock at 12 to 14 feet below grade.

Groundwater was encountered at approximately 9.0 feet below grade during soil sampling and confirmed during the groundwater sampling activities.

### ***Soil Analytical Data***

Soil samples collected from borings SB-1 through SB-3 did not show the presence of any PVOCs or PAHs above any regulatory or guidance limits.

Due to the presence of the backfill in the former tank bed, only a bottom sample was collected from SB-4 (10 to 12-foot bg). Samples analysis showed the presence of toluene (180,000 µg/kg) above the NR 720 Generic Residual Contaminant Level (GRCL); naphthalene (2,700 µg /kg) above the PAH guidance Table 1 value; 1,3,5-trimethylbenzene (83,000 µg /kg) and 1,2,4-trimethylbenzene (270,000 µg/kg) above the NR 746 Table 1 value; and benzene (16,000 µg /kg), ethylbenzene (130,000 µg /kg), and total xylenes (540,000 µg /kg) all above both the GRCL and Table 1 value.

### ***Groundwater Data***

Groundwater samples collected from SB-1 through SB-3 did not show the presence of any PVOCs or PAHs above NR 140 preventive action limits (PAL) or enforcement standard (ES) limits.

### **RECOMMENDATIONS**

Based on the information provided, BAY recommends the following upon approval from the WDNR:

- Field activities associated with collecting a groundwater sample from SB-4 if allowable.

- As soon as weather permits, collecting an appropriate number of samples from the stockpile and submitting for PVOC and PAH analysis. If soil conditions allow, the stockpile will be spread in its current location.

**CLOSING**

If you have any questions regarding the information contained within this report, please contact me at (920) 433-9335 or via e-mail at [nmversch@bayenvironmental.com](mailto:nmversch@bayenvironmental.com)

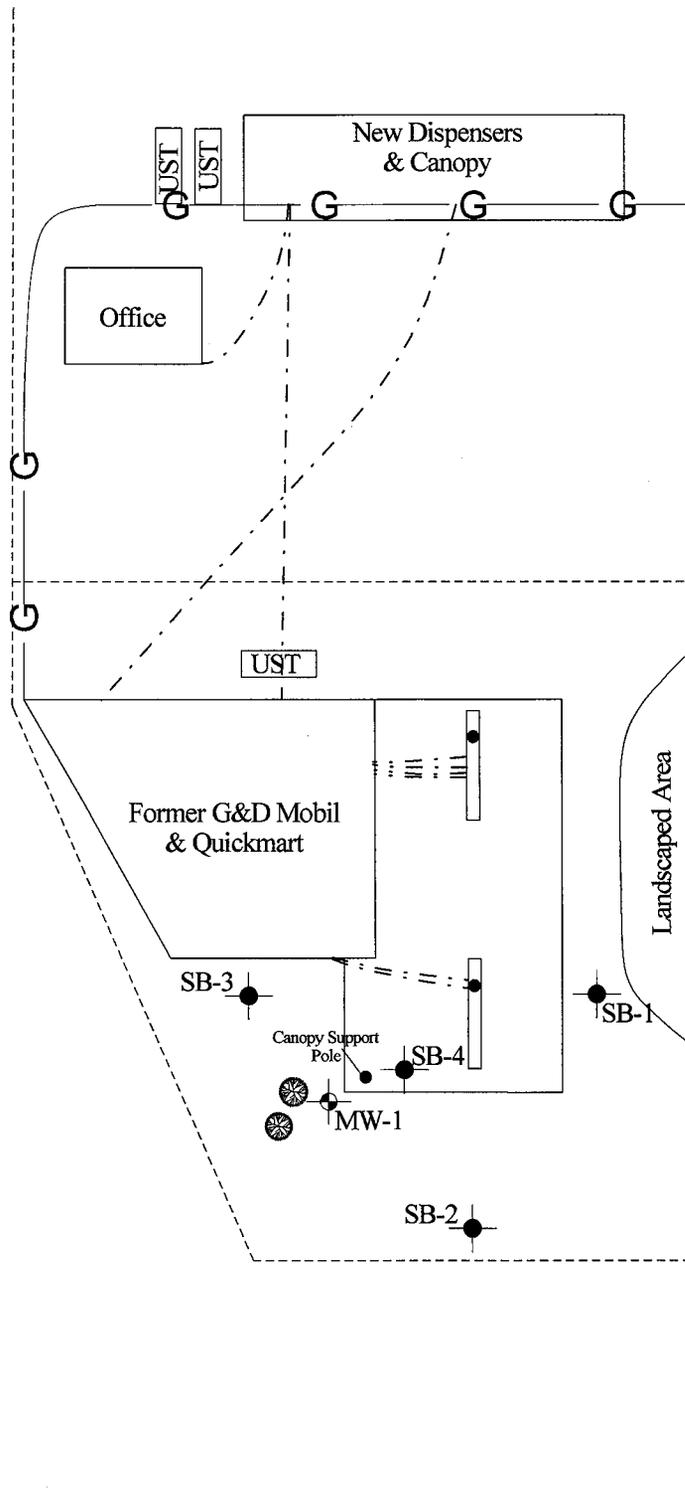

Sincerely,

**BAY ENVIRONMENTAL STRATEGIES, INC.**

Noel Versch, CHMM

Values in brackets represent results greater than or equal to the LOD but less than the LOQ and are within a region of "Less-Certain Quantitation". Results greater than or equal to the LOQ are considered to be in the region of "Certain Quantitation". LOD and/or LOQ tagged with an asterisk(\*) are considered Reporting Limits. All LOD/LOQs adjusted to reflect dilution.

LOD = Limit of Detection      LOQ = Limit of Quantitation      ND = Not Detected (< LOD)      1000 ug/L = 1 mg/L  
DWB = Dry Weight Basis      NA = Not Applicable      %DWB = (mg/kg DWB) / 10000  
MCL = Maximum Contaminant Levels for Drinking Water Samples. Shaded results indicate >MCL.

Sample: 465521 SB-2 Collected: 01/15/08 Analyzed: 01/30/08 -

ANALYTE NAME	RESULT	UNITS	DIL	LOD	LOQ	Note
Acenaphthene	0.65	ug/L	2	0.038	0.13	
Acenaphthylene	[0.057]	ug/L	2	0.032	0.10	
Anthracene	[0.062]	ug/L	2	0.036	0.12	
Benzo (a) anthracene	[0.034]	ug/L	2	0.024	0.082	
Benzo (a) pyrene	ND	ug/L	2	0.028	0.094	
Benzo (b) fluoranthene	ND	ug/L	2	0.034	0.11	
Benzo (g,h,i) perylene	ND	ug/L	2	0.028	0.094	
Benzo (k) fluoranthene	ND	ug/L	2	0.032	0.10	
Chrysene	ND	ug/L	2	0.036	0.12	
Dibenzo (a,h) anthracene	ND	ug/L	2	0.028	0.094	
Fluoranthene	[0.074]	ug/L	2	0.038	0.13	
Fluorene	0.48	ug/L	2	0.034	0.11	
Indeno (1,2,3-cd) pyrene	ND	ug/L	2	0.024	0.082	
Methyl-1-Naphthalene	2.4	ug/L	2	0.034	0.11	
Methyl-2-Naphthalene	0.40	ug/L	2	0.048	0.16	
Naphthalene	1.9	ug/L	2	0.048	0.16	
Phenanthrene	ND	ug/L	2	0.042	0.14	
Pyrene	[0.067]	ug/L	2	0.040	0.14	
Nitrobenzene-d5 (SURR)	109%					SR S
2-Fluorobiphenyl (SURR)	71%					S
Terphenyl-d14 (SURR)	54%					S

**NOTES APPLICABLE TO THIS ANALYSIS:**

S = This compound is a surrogate used to evaluate the quality control of a method.

SR = Surrogate recovery was outside QC limits.

Nitrobenzene-d5 recovered above QC limits.

## ANALYTICAL RESULTS: Polynuclear Aromatic Hydrocarbons by EPA 8270C SIM

Page 3 of 3

Customer: Bay Environmental Strategies Inc NLS Project: 114364

Project Description: G &amp; D Mobil

Project Title: Template: 8270PAHW Printed: 02/04/2008 08:43

Sample: 465522 SB-3 Collected: 01/15/08 Analyzed: 01/30/08

ANALYTE NAME	RESULT	UNITS	DIL	LOD	LOQ	Note
Acenaphthene	1.3	ug/L	2	0.038	0.13	
Acenaphthylene	0.11	ug/L	2	0.032	0.10
