That is no problem in storing those containers by the shed.

Good morning Tom –

I wanted to send you an update – and sent the message before I finished it.

The consultant will be on your property starting Monday morning June 24, 2019. They will be installing six wells as indicated by the yellow pins in the image bellow. The plan is to develop those wells and then sample the new and existing wells at the end of the week.

I also wanted to confirm with you if we could leave a few drums for investigative derived waste (groundwater and soil cuttings) on your property behind the shed. The drums will be removed by the consultant following receipt of the analytical results.

Please let me know if you have any questions.

Thank you,
Sarah
