Good morning Dennis,

I looked into your question from this morning as to whether the Village is able to help push the investigation and remediation along at D&G mobil, based on concern over the contamination potentially impacting the municipal well, and the impacts that have been identified on the Northwoods property. As I stated on the phone any Village authority would come from the municipal code, so I am not sure that there is anything specific for the Village to do. Your continued persistence and concern is helpful.

Also as I stated on the phone your best resource for tank related questions is DTACP and I believe you have the contact for the Coleman area. They will have the best and most up to date information about tank closures and requirements.

Please let me know if you have any questions.

Thank you,  
Sarah
