Subject: Change Order - Install Electrical disconnect at W14789 HWy 73, Jump River - for new well
Attachments: JRWell8-13-18.pdf; 14789 Hwy 73 water sample - VOC.pdf; Private Wells.pdf; Pump inside 14789.jpg; IMG_1029.JPG; IMG_1033.JPG; IMG_1034.JPG

Carrie.

We installed the new well at the property W14789 Hwy. 73 (Keepers) in Jump River. The well has excellent production (>10 gpm). (Pictures attached.)

We collected a water sample (VOC 524.2) and water is clean except for MTBE (.27 ug/l) at concentrations well below PAL (see attached lab report). This is consistent with the adjacent wells (8890 Bridge, 14778 River)(see attached map of private wells).

Based on historical sampling data from adjacent wells and other site work, I recommend we connect the new well to the residence 14789 Hwy 73. This work will be completed per approved Bid from driller (Kramer).

CHANGE ORDER

The well driller (Kramer) states the residence does not have a disconnect for the new well (see attached picture).

The local electrician (Ideal Services – Doug Stanek) will install a disconnect to Code for \$700 (see attached quote).

Please approve the additional \$700 for the correct electrical disconnect so the well driller can connect the new well to the house water supply.

Thanks
