You can remove it and abandon the MWs. This site was just paused.

Should we leave the SVE system in place for now? Or should we remove it?

**Subject:** Jim's Bar closure decision

Hi Ken, yesterday the NOR Closure Committee reviewed Jim's Bar and paused the site until the following items are submitted. If you have any questions, please feel free to give me a call. Thanks, Carrie

- A notification for GW contamination should be sent to 14767 Hwy 73 (MW-6). You will probably need a cost request and I can place a note in Tracker
- The GW plume should be drawn to include Keeper's and the Convenience Store
- At least one figure should show that Keeper's is a shared well
- Please explain the hydrologic conditions. Why does GW flow east and west? The concern here is why does the plume impact Keepers and the Convenience Store? I have attached David Swimm's maps/notes for you review

Upon resubmittal of these items, the site can be fast tracked.

**We are committed to service excellence.**
