Carrie.

Please recall that we left tracks when we installed monitoring wells (see attached pictures and email string below).

I expect we will do the same when we abandon wells.

Can you please approve cost to repair the expected lawn damage? I estimate same cost as before...\$300 (see below).

Thanks

Subject: RE: Lawn Repair - Cindy Piotrowski's home

Carrie.

I found some local folks who will help repairing the lawn at Cindy's (see earlier emails).

Estimated Cost:

5 yds of Black dirt \$110
Labor estimate \$200.

So estimate repair cost to be \$300.

Hi Ken, I will just need a written estimate from the concrete guy. An email from him is fine too

We are committed to service excellence.

Visit our survey at <http://dnr.wi.gov/customersurvey> to evaluate how I did.

Subject: Jump River - concrete patch of water line hole - \$175

Hi Carrie.

We installed the water line for the new Store well yesterday (20th).

We horizontal drilled from the well to beneath the Store floor...coming up through the floor.

Our original plan was to connect outside but due to owner's concerns and buried utilities, this was the better alternative.

The concrete floor needs to be patched. I have a local concrete guy who can patch it for \$175.

Can you please approve \$175 for repairing (patching) the concrete floor?

Thanks

Subject: Change Order: (Jump River): Abandon (grout) SVE piping - 750 feet (estimated): \$300/hr x 8 hours (estimated) = \$2400

Carrie.

Per your email string below, I contacted the driller about abandoning the SVE piping at Jump River (estimate 750 feet of SVE piping). The driller estimated the additional time in email below.

Please approve the additional cost (\$2400) to abandon/grout the SVE piping.

Thanks

Subject: RE: [External] FW: Abandon monitoring wells and grout SVE piping

Ken,

We can perform the additional work on an hourly basis. I'm estimating that it will take 8 hours, but that's probably on the high end.

8 hours x \$ 300.00 /hour = Cost \$2,400.00

Let me know if you have any questions.

Thanks,

Subject: RE: Jim's Bar closure decision

What is needed for abandoning SVE piping? I am thinking cut below grade and cap. Or does Northern Region require filling with grout??

Thanks

Subject: Jim's Bar closure decision

Hi Ken, yesterday the NOR Closure Committee reviewed Jim's Bar and paused the site until the following items are submitted. If you have any questions, please feel free to give me a call. Thanks, Carrie

- A notification for GW contamination should be sent to 14767 Hwy 73 (MW-6). You will probably need a cost request and I can place a note in Tracker
- The GW plume should be drawn to include Keeper's and the Convenience Store
- At least one figure should show that Keeper's is a shared well
- Please explain the hydrologic conditions. Why does GW flow east and west? The concern here is why does the plume impact Keepers and the Convenience Store? I have attached David Swimm's maps/notes for you review

Upon resubmittal of these items, the site can be fast tracked.

We are committed to service excellence.

Visit our survey at <http://dnr.wi.gov/customersurvey> to evaluate how I did.
