Mr. Robert Anderson
10531 State Hwy. 70
Siren, WI 54872

Dear Mr. Anderson:

Enclosed are test results from a water sample collected on February 6, 1991 from your home. Your water was tested for 50 volatile organic compounds (VOC's) which include a variety of solvents, refrigerants, and gasoline components. None of these compounds were found in your water. Your water was sampled because the old well at Andy's Bait Shop to your west had experienced gasoline contamination.

Your well has been assigned a Wisconsin unique well number to assist in record keeping for any future sampling which may be done. Please put one of the enclosed stickers on the main electrical fuse box and the second sticker on the water supply pipe where it enters the building.

If you have any questions, feel free to contact me at (715) 635-4050.

Sincerely,

A handwritten signature in cursive script that reads "Craig Roesler".
