SUBJECT: No Further Action Request, September 13, 1996, Acetic Acid Release
Two Stanton Station, Marinette, Wisconsin

Dear Mr. Harris:

The Department has received the spill response and documentation summary. The Department of Natural Resources has reviewed the response summary and concur that the environment has been restored to the extent practicable as provided in ch. NR 708.09, Wis. Adm. Code. Therefore, the Department is requiring no further action at this time.

We appreciate your efforts to protect and restore the environment at this site. If you have any questions regarding this No Further Action determination, please contact me at the number listed below.

Sincerely,

Roxanne Nelezen Chronert
Spills Coordinator - Hydrogeologist

LMD SOLID WASTE

Subject: Acetic Acid Release on 09/13/96
Disposition of Neutralized Cleanup Materials

Dear Mrs. Nelezen Chronert:

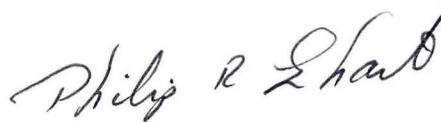

As mentioned during our recent conversations, the small quantity of acetic acid that was released was promptly isolated with Oil Dri then neutralized with excess Bicarbonate of Soda. The resulting "solid" Oil Dri - calcium acetate - sodium bicarbonate mixture was scooped up into one of our "salt buggies" and put into a special waste "Lugger Box" along with other salts from our wastewater pre-treatment process (evaporation/crystallization/centrifugation/distillation/absorption). Full Lugger Boxes at SpecialtyChem are routinely picked up several times weekly by CWM Midwest Transport and taken to the AETS Controlled Waste Division facility, Menomonee Falls, WI for further handling.

Should you have any questions or desire any additional information regarding handling of cleanup materials from this incident, please do not hesitate to contact either of us at (715) 735-9033.

Sincerely,

John W. Harris
