Subject: RE: Blower

Hi Qefli,

Looking for an update for the vapor mitigation system. Has the blower fan been installed, and entire system been inspected and/or commissioned?

I will be out of the office shortly, but will be looking forward to your reply by Monday morning.

Thank you,
Josie

I dont understand your question. Certainly A1 can do the inspection. I have no idea if it would or wouldnt be ready. What i can tell you is that my mafia attorney Don Gallo has made it impossible for me to leverage any updates if the inspection fails.

Hi Qefli,

Thank you for this update. As mentioned in the letter I sent via email yesterday, the vapor mitigation system is requiring inspection, and the DNR is recommending a certified radon mitigator (e.g. A-1 Vacuum & Radon) verify that it is working properly. We're requiring the system be inspected by next Friday, November 6th.

Please feel free to give me a call at 920-366-5685 if you would like to discuss, or don't believe you will be able to meet this deadline.

Thank you,

Josie

Good morning Neziri,

System was installed on Friday. Electrician will be there by Wed to hook up electrical. Will be done then.

Thank you,

Adam Olinski
