Subject: RE: Question: One Hour Martinizing - Main

This was from the VPLE investigation. This is the excerpt from Page 9 of GEC's VPLE SITE INVESTIGATION UPDATE AND CONSTRUCTION DOCUMENTATION REPORT. I don't think they mapped it but here was their rationale:

A groundwater sample was collected from an open utility excavation (W-1) located in the southwestern portion of the subject site on June 20, 2016. The sample was collected as a result of the excavation contractor (DeNoble Excavating) breaking an existing water line during replacement of a storm water manhole and storm water inlet tie-in. The sample was collected from the bottom of the excavation at a depth of about 7 feet and was collected for the purpose of evaluating groundwater quality within the utility trench. The clear stone around the piping was replaced subsequent to completing the water line repair and storm water manhole replacement. The sample was submitted for laboratory analysis for the presence of voes.

Does this work for ya Kristin?

Matt

Subject: Question: One Hour Martinizing - Main

Hi Matt. One more question for you with respect to the One Hour Martinizing – Main closure request. On page 23 of Table A.1 there is a sample identified as W-1. What is this sample and where is it located?

Thank you in advance for your response?

We are committed to service excellence.

Visit our survey at <http://dnr.wi.gov/customersurvey> to evaluate how I did.
