CERTIFIED MAIL/RETURN RECEIPT REQUESTED

SUBJECT: Doug's Tire (Former)
811 Lake Avenue
Ladysmith, Wisconsin
WDNR BRRTS # 03-55-000408

Dear Ms. Jaakola and Mr. Pavlik:

In a letter dated June 23, 2020, prepared by Meridian Environmental (attached), the former owner of the property located at 209 West 9th Street North (Property) was notified of groundwater contamination that originated from the Doug's Tire (Former) property, located at 811 Lake Avenue, migrated onto the Property. The owner of the Property at the time was given (30) thirty days to provide technical information to the Department of Natural Resources (DNR) that indicated closure should not be granted. The DNR received no information from the Property owner at the time.

According to Rusk County property records, you are the current owners of the Property. Since the letter mentioned above was sent on June 23, 2020, the DNR is notifying you of the groundwater contamination remaining on your Property.

The DNR has no information that indicates the groundwater conditions have changed since the attached letter was sent on June 23, 2020. Please review the attached letter and notify the DNR within (30) thirty days if you have technical information that indicates final closure of the Doug's Tire (Former) site should not be granted. If you do not have any technical information to provide, you can help expedite the closure of this site by sending me a letter or an email stating that you do not have any technical information to provide and hereby waive the (30) thirty-day comment period. Please submit any information you would like to provide to me at the address listed in the letterhead or by email at Carrie.Stoltz@Wisconsin.gov. You may also call me at (715) 360-1966 if you have any questions concerning this letter.

Sincerely,

Carrie Stoltz
Hydrogeologist
Remediation and Redevelopment Program

**Notification of Continuing Obligations
and Residual Contamination**

Section A: Deeded Property Notification: Residual Contamination and/or Continuing Obligations

KEEP THIS DOCUMENT WITH YOUR PROPERTY RECORDS

209 W 9th St N
Ladysmith, WI, 54848

Dear Ms. Williams:

I am providing this letter to inform you of the location and extent of contamination remaining on your property, and of certain long-term responsibilities (continuing obligations) for which you may become responsible.

I have investigated a release of:

petroleum

on 811 Lake Ave W, Ladysmith, WI, 54848 that has shown that contamination has migrated onto your property. I have responded to the release and will be requesting that the Department of Natural Resources (DNR) grant case closure. Closure means that the DNR will not be requiring any further investigation or cleanup action to be taken. However, continuing obligations may be imposed as a condition of closure approval.

You have 30 days to comment on the attached legal description of your property and on the proposed closure request:

Please review the enclosed legal description of your property, and notify Kenneth Shimko at 2711 North Elco Road, Fall Creek, WI, 54742 within the next 30 days if the legal description is incorrect.

The DNR will not review my closure request for at least 30 days after the date of receipt of this letter. As an affected property owner, you have a right to contact the DNR to provide any technical information that you may have that indicates that closure should not be granted for this site. If you would like to submit any information that is relevant to this closure request, or if you want to waive the 30 day comment period, you should mail that information to the DNR contact: 107 Sutliff Ave, Rhinelander, WI, 54501, or at Carrie.Stoltz@wisconsin.gov.

Your Long-Term Responsibilities as a Property Owner and Occupant:

The responses included

remedial excavation, free product removal, soil vapor extraction, ground water sampling

The continuing obligations I am proposing that affect your property are listed below, under the heading **Continuing Obligations**. Under s. 292.12 (5), Wis. Stats., current and future owners and occupants of this property are responsible for complying with continuing obligations imposed as part of an approved closure.

The fact sheet "Continuing Obligations for Environmental Protection" (DNR publication RR 819) has been included with this letter, to help explain the responsibilities you may have for maintenance of a certain continuing obligation, the limits of any liability for investigation and cleanup of contamination, and how these differ. If the fact sheet is lost, you may obtain copies at <http://dnr.wi.gov/files/PDF/pubs/rr/RR819.pdf>.

Contract for responsibility for continuing obligation:

Before I request closure, I will need to inform the DNR as to whom will be responsible for the continuing obligation/s on your property.

Betty Williams

Under s. 292.12, Wis. Stats., the responsibility for maintaining all necessary continuing obligations for your property will fall on you or any subsequent property owner, unless another person has a legally enforceable responsibility to comply with the requirements of the final closure letter. If you need more time to finalize an agreement on the responsibility for the continuing obligations on your Property, you may request additional time from the DNR contact identified in **Contact Information**.

(Note: Future property owners would need to negotiate a new agreement.)

G-A

Notification of Continuing Obligations and Residual Contamination

Groundwater Contamination:

Groundwater contamination originated at the property located at 811 Lake Ave W, Ladysmith, WI, 54848. Contaminated groundwater has migrated onto your property at:

209 W 9th St N

The levels of
petroleum

contamination in the groundwater on your property are above the state groundwater enforcement standards found in ch. NR 140, Wis. Adm. Code.

However, the environmental consultants who have investigated this contamination have informed me that this groundwater contaminant plume is stable or receding and will naturally degrade over time. I believe that allowing natural attenuation, or the breakdown of contaminants in groundwater due to naturally occurring processes, to complete the cleanup at this site will meet the case closure requirements of ch. NR 726, Wis. Adm. Code. As part of my request for case closure, I am requesting that the DNR accept natural attenuation as the final remedy for this site.

The following DNR fact sheet (RR 671, "What Landowners Should Know: Information About Using Natural Attenuation to Clean Up Contaminated Groundwater") has been included with this notification, to help explain the use of natural attenuation as a remedy. If the fact sheet is lost, you may obtain a copy at <http://dnr.wi.gov/files/PDF/pubs/rr/RR671.pdf>.

Continuing Obligations on Your Property: As part of the cleanup, I am proposing that the following continuing obligations be used at your property, to address future exposure to residual contamination. If my closure request is approved, you will be responsible for the following continuing obligations.

To construct a new well or to reconstruct an existing well, the property owner at the time of construction or reconstruction will need to obtain prior approval from the DNR. See **Well Construction Requirements**. Typically, this results in casing off a portion of the aquifer during drilling, when needed, to protect the water supply.

Continued monitoring was requested/required for certain monitoring wells

Maintenance and Audits of Continuing Obligations:

If compliance with a maintenance plan is required as part of a continuing obligation, an inspection log will need to be filled out periodically, and kept available for inspection by the DNR. Submittal of the inspection log may also be required. You will also need to notify any future owners or occupants of this property of the need to maintain the continuing obligation and to document that maintenance in the inspection log. Periodic audits of these continuing obligations may be conducted by the DNR, to ensure that potential exposure to residual contamination is being addressed. The DNR provides notification before conducting site visits as part of the audit.

Well Construction Requirements:

If this site is closed, all properties within the site boundaries where contamination remains, or where a continuing obligation is applied, will be listed on the Bureau for Remediation and Redevelopment Tracking System (BRRTS) on the Web, at <https://dnr.wi.gov/topic/Brownfields/WRRD.html>. Inclusion on this database provides public notice of remaining contamination and of any continuing obligations. Documents can be viewed on this database, and include final closure letters, site maps and any applicable maintenance plans. The location of the site may also be viewed on the Remediation and Redevelopment Sites Map (RR Sites Map), at the same internet address listed above.

DNR approval prior to well construction or reconstruction is required in accordance with s. NR 812.09 (4) (w), Wis. Adm. Code. This requirement applies to private drinking water wells and high capacity wells. Special well construction standards may be necessary to protect the well from the remaining contamination. The property owner needs to first obtain approval from a regional water supply specialist in DNR's Drinking Water and Groundwater Program. A well driller can help complete this form. The well construction application, form 3300-254, is on the internet at <https://dnr.wi.gov/files/PDF/forms/3300/3300-254.pdf>.

G-A

**Notification of Continuing Obligations
and Residual Contamination**

Site Closure:

If the DNR grants closure, you will receive a letter which defines the specific continuing obligations on your property. The status of the site (open or closed) may also be checked by searching BRRTS on the Web. You may view or download a copy of the closure letter (sent to the responsible party) from BRRTS on the Web. You may also request a copy of the closure letter from the **responsible party** or by writing to the DNR contact, at Carrie Stoltz, Carrie. Stoltz@wisconsin.gov, (715) 365-8942. The final closure letter will contain a description of the continuing obligation, any prohibitions on activities and will include any applicable maintenance plan.

If you have any questions regarding this notification, I can be reached at: (715) 832-6608
