Subject: Remaining Actions Needed for Case Closure under Wis. Adm. Code chs. NR 700-754
Glacier Oil – N6534 Highway 51, Portage, WI 53901
DNR BRRTS Activity # 03-11-000494

Dear Mr. Mitchell:

On July 30, 2020, the Department of Natural Resources (DNR) reviewed your request for closure of the case described above. The DNR reviews environmental remediation cases for compliance with applicable local, state and federal laws. The following actions are required prior to the DNR granting you case closure in compliance with Wis. Stat. ch. 292 and Wis. Adm. Code chs. NR 700-754. Upon completion of these actions, closure approval will be provided. Pursuant to Wis. Adm. Code § NR 726.09 (2) (g), you are required to provide this information to the DNR within 120 days of the date of this letter.

Remaining Actions Needed

Monitoring Well or Remedial System Piping Filling and Sealing

The monitoring wells, soil vapor extraction wells, and air sparging wells at the site must be properly filled and sealed in accordance with Wis. Adm. Code ch. NR 141. Documentation of filling and sealing for all wells and boreholes must be submitted to Luke Lampo on DNR Form 3300-005. To download the form, go online at dnr.wi.gov and search “form 3300-005”.

Documentation

When the required actions are completed, submit the appropriate documentation within 120 days of the date of this letter, to verify completion. At that point, your closure request can be approved and your case can be closed.

The following revisions are needed to your closure request:

- On the first page, include the FID # 111077670.
- Under Section 1.G, correct the BRRTS # to 03-11-000494.
- In Attachment B.3.a, correct the extent of the “Residual Groundwater Exceeding PAL” plume in Cross-Section A-A’ so that it matches the extent shown in the aerial view.
- In Attachment B.3.a, add the location of piezometer P-1 to the aerial view.

If any changes to the closure request are still outstanding, submit all changes to the original closure request. Only revisions or updates need to be submitted. The submittal of both an electronic and paper copy are required in accordance with Wis. Adm. Code s. NR 726.09 (1). See *Guidance for Electronic Submittals for the Remediation and Redevelopment Program, RR- 690* for additional information. To view the document online, go to dnr.wi.gov and search “RR 690”.

Listing on Database

This site will be listed on the DNR's Bureau for Remediation and Redevelopment Tracking System on the Web (BOTW) and RR Sites Map, to provide public notice of remaining contamination and continuing obligations. The continuing obligations will be specified in the final case closure approval letter sent to you. Information that was submitted with your closure request application will be included on BOTW, located online at dnr.wi.gov and search "BOTW".

In Conclusion

We appreciate your efforts to restore the environment at this site. This remedial action project is nearing completion. I look forward to working with you to complete all remaining actions that are necessary to achieve case closure.

If you have any questions regarding this letter, please contact the project manager, Luke Lampo, at (608) 206-5809 or luke.lampo@wisconsin.gov.

Sincerely,

A handwritten signature in blue ink, appearing to read "St L Martin".

Steven L. Martin, P.G.
South Central Region Team Supervisor
Remediation & Redevelopment Program
