Subject: Site Investigation Report for the Former Anderson Property, Hub City, Wisconsin
DNR Case 03-53-000559

Dear Ed and Rita:

Attached is the copy of the site investigation report for the above-referenced case, which was prepared by True North for the Wisconsin Department of Natural Resources.

I am sending you the report because work was done on your property and because you are still considered the responsible parties for the case. Please keep the report for your records.

The report shows the contamination is located near the former tank locations and is mostly contained within shallow fine-grained materials. Groundwater flow and contaminant migration appears to be occurring in a southwesterly direction.

There is presently no additional funding for the project.

Feel free to contact me with questions.

Jeff Ackerman, P. G.
Hydrogeologist
