Attached is the proposed sampling map. Here is a description of our scope of work.

- Collect groundwater samples from existing monitoring wells MW-4, MW-5, MW-10, MW-11, MW-12, MW-18, MW-19, MW-20, PZ-23, and MW-24. There have been past PAL attainments at these wells. We will also collect groundwater level measurements at all wells, including MW-8, MW-9, and PZ-14.
- Advance two direct push soil probes, B-23 and B-24, and collect one soil sample from each probe.
- Collect vapor samples from VP-5, VP-6, and S-1.

Bill,

Great to hear. When you get a chance could you send over your workplan, or at a minimum a figure showing the locations where sampling will take place? Reach out with any questions. Thank you,

**We are committed to service excellence.**

Visit our survey at <http://dnr.wi.gov/customersurvey> to evaluate how I did.

Hi Gwen,

Arlene Martin just hired us to start the second phase of work, which includes follow-up vapor testing, groundwater sampling from existing wells, and two soil probes in the source area.

Thanks,
