No that is fine. We likely wouldn't be able to excavate until next spring anyway.
Thanks,

Jason Powell

Jason,

After discussing this site with the closure committee, the consensus was to do the sub-slab VI sampling first before considering an excavation. If you don't have any strong objections, I am going to send this out.

Yes, we are going to attempt true sub-slab samples.

Jason,

I am looking at the Kopatz proposal. Has true sub-slab vapor sampling been done there? Is your proposal to actually do sub-slab sampling using a sub-slab probe?
