**DOCUMENTS NEEDED:**

Closure Letter, and any conditional closure letter issued

Copy of most recent deed, including legal description, for all affected properties

Certified survey map or relevant portion of the recorded plat map (if referenced in the legal description) for all affected properties  
County Parcel ID number, if used for county, for all affected properties 190539321410 + 19053921132

Location Map which outlines all properties within contaminated site boundaries on USGS topographic map or plat map in sufficient detail to permit the parcels to be located easily (8.5x14" if paper copy). If groundwater standards are exceeded, the map must also include the location of all municipal and potable wells within 1200' of the site.

Detailed Site Map(s) for all affected properties, showing buildings, roads, property boundaries, contaminant sources, utility lines, monitoring wells and potable wells. (8.5x14", if paper copy) This map shall also show the location of all contaminated public streets, highway and railroad rights-of-way in relation to the source property and in relation to the boundaries of groundwater contamination exceeding ch. NR 140 ESs and soil contamination exceeding ch. NR 720 generic or SSRCLs.

Tables of Latest Groundwater Analytical Results (no shading or cross-hatching)

Tables of Latest Soil Analytical Results (no shading or cross-hatching)

Isoconcentration map(s), if required for site investigation (SI) (8.5x14" if paper copy). The isoconcentration map should have flow direction and extent of groundwater contamination defined. If not available, include the latest extent of contaminant plume map.

GW: Table of water level elevations, with sampling dates, and free product noted if present

GW: Latest groundwater flow direction/monitoring well location map (should be 2 maps if maximum variation in flow direction is greater than 20 degrees)

SOIL: Latest horizontal extent of contamination exceeding generic or SSRCLs, with one contour

Geologic cross-sections, if required for SI. (8.5x14" if paper copy)

RP certified statement that legal descriptions are complete and accurate

Copies of off-source notification letters (if applicable)

Letter informing ROW owner of residual contamination (if applicable)(public, highway or railroad ROW)

Copy of (soil or land use) deed restriction(s) or deed notice if any required as a condition of closure

Mr. Al Denenny  
Denenny's Service Station  
6579 W STH 70  
Winter, WI 54896-9501

**SUBJECT:** Final Case Closure By Closure Committee  
Denenny's Service Station, 6579 W STH 70, Winter, WI  
WDNR BRRTS #:03-58-000643  
PECFA # 54896-9501-67

Dear Mr. Denenny:

On June 3, 2004, your site as described above was reviewed for closure by the Northern Closure Committee. This committee reviews environmental remediation cases for compliance with state laws and standards to maintain consistency in the closure of these cases. On June 8, 2004, you were notified that the Closure Committee had granted conditional closure to this case.

On July 2, 2004, the Department received correspondence indicating that you have complied with the conditions of closure, specifically, abandonment of the monitoring wells and provision of additional information for the GIS Registry. Based on the correspondence and data provided, it appears that your case has been remediated to Department standards in accordance with s. NR 726.05, Wis. Adm. Code. The Department considers this case closed and no further investigation, remediation or other action is required at this time.

Your site will be listed on the DNR Remediation and Redevelopment GIS Registry of Closed Remediation Sites. Information that was submitted with your closure request application will be included on the registry. To review the sites on the GIS Registry web page, visit <http://gomapout.dnr.state.wi.us/org/at/et/geo/gwur/index.htm>. If your property is listed on the GIS Registry due to groundwater contamination exceeding ch. NR 140 standards at the time of closure, and you intend to construct or reconstruct a well, you will need Department approval. Department approval is required before construction or reconstruction of a well on a property listed on the GIS Registry, in accordance with s. NR 812.09(4)(w). To obtain approval, Form 3300-254 needs to be completed and submitted to the DNR Drinking and Groundwater program's regional water supply specialist. This form can be obtained on-line at the web address listed above.

If this is a PECFA site, section 101.143, Wis. Stats., requires that PECFA claimants seeking reimbursement of interest costs, for sites with petroleum contamination, submit a final reimbursement claim within 120 days after they receive a closure letter on their site. For claims

not received by the PECFA Program within 120 days of the date of this letter, interest costs after 60 days of the date of this letter will not be eligible for PECFA reimbursement.

If there is equipment purchased with PECFA funds remaining at the site, contact the Commerce PECFA Program to determine the method for salvaging the equipment.

Please be aware that this case may be reopened pursuant to s. NR 726.09, Wis. Adm. Code, if additional information regarding site conditions indicates that contamination on or from the site poses a threat to public health, safety or welfare, or the environment.

The Department appreciates your efforts to restore the environment at this site. If you have any questions regarding this letter, please contact me at 715-365-8990.

Sincerely,  
NORTHERN REGION

Janet Kazda

Subject: Conditional Case Closure  
Denenny's Service Station, 6579 W STH 70, Winter, Wisconsin  
WDNR BRRTS # 03-58-000643  
PECFA #54896-9501-67

Dear Mr. Denenny:

On June 3, 2004, your request for closure of the case described above was reviewed by the Northern Region Closure Committee. The Closure Committee reviews environmental remediation cases for compliance with state rules and statutes to maintain consistency in the closure of these cases. After careful review of the closure request, the Closure Committee has determined that the petroleum contamination on the site appears to have been investigated and remediated to the extent practicable under site conditions. Your case has been remediated to Department standards in accordance with s. NR 726.05, Wis. Adm. Code and will be closed if the following conditions are satisfied:

1. The monitoring wells at the site must be properly abandoned in compliance with ch. NR 141, Wis. Adm. Code. Documentation of well abandonment must be submitted to me on Form 3300-5B found at [www.dnr.state.wi.us/org/water/dgw/gw/](http://www.dnr.state.wi.us/org/water/dgw/gw/) or provided by the Department of Natural Resources.
2. The following items were missing from the GIS Registry package submitted for your site:
  - a. WTM coordinates for the off-site property (North Central Power)
  - b. Street address for the North Central Power property.
  - c. Copy of the deed for the North Central Power property.
  - d. Parcel Identification Number for the North Central Power property
  - e. A map showing the latest groundwater flow direction and monitoring well locations on the site.
  - f. A map showing the latest horizontal extent of soil contamination.

When the above conditions have been satisfied and the proper forms and documentation submitted, your case will be closed. Your site will be listed on the DNR Remediation and Redevelopment GIS Registry of Closed Remediation Sites. Information that was submitted with your closure request application will be included on the registry. To review the sites on the GIS Registry web page, visit <http://gomapout.dnr.state.wi.us/org/at/et/geo/gwur/index.htm>.

If this is a PECFA site, section 101.143, Wis. Stats., requires that PECFA claimants seeking reimbursement of interest costs, for sites with petroleum contamination, submit a final reimbursement claim within 120 days after they receive a closure letter on their site. For claims not received by the PECFA Program within 120 days of the date of this letter, interest costs after 60 days of the date of this letter will not be eligible for PECFA reimbursement.

Please be aware that the case may be reopened pursuant to s. NR 726.09, Wis. Adm. Code, if additional information regarding site conditions indicates that contamination on or from the site poses a threat to public health, safety, or welfare or to the environment.

We appreciate your efforts to restore the environment at this site. If you have any questions regarding this letter, please contact me at 715-365-8990.

Sincerely,  
NORTHERN REGION

**ABBREVIATIONS AND ACRONYMS**

GRO = Gasoline Range Organics  
DRO = Diesel Range Organics  
B = Benzene  
E = Ethylbenzene  
T = Toluene  
X = Total Xylenes  
MTBE = Methyl tert-butyl ether  
1,2 DCA = 1,2 Dichloroethane  
NA = not analyzed  
mg/kg = milligrams per kilogram or parts per million

**DESIGNATIONS**

Blank boxes in table represent samples that were not analyzed

0.032 Soil samples exceed NR 700 Standards

< = Not detected at or above this value

**FOOTNOTES**

- a = Significant early eluting peaks before GRO window
- b = Significant late eluting peaks after GRO window
- c = Majority of GRO compounds in early portion of window
- d = Majority of GRO compounds in later portion of window
- e = DRO window shows a raised baseline

Statement

The legal description attached to this statement describes the contaminated property of the Denenny's Service Station site in the Village of Winter, Wisconsin, and is complete and accurate.

Alec Denenny, Owner  
Denenny's Service Station  
6579 W. State Highway 70  
Winter, WI 54896  
(715) 266-2533

  
Date

May 8, 2003  
Denenny's Service Station  
6579 W. State Road 70  
Winter, WI 54896-9501

Mr. John Dahlberg, Secretary/Treasurer  
North Central Power  
P.O. Box 9  
Grantsburg, WI 54840

Re: Site Closure  
Denenny's Service Station  
WDNR BRRTS No. 03-58-000643  
COMM PECFA No. 54896-9501-67

Dear Mr. Dahlberg:

I am seeking site closure from the Wisconsin Department of Natural Resources (WDNR) of the petroleum contamination at my service station. The site is located on the southwest corner of CTH W and State Road 70 in Winter. The WDNR has certain requirements that must be met when seeking closure. One of these involves notifying down gradient property owners of the ground water contamination to satisfy the requirements of s. NR 726.05 (3)(a)4.g.

In 1993, an underground storage tank (UST) closure assessment conducted at the site found leaking product piping. A petroleum site investigation has been conducted at and down gradient of the site. This included installing soil borings and ground water monitoring wells to define the degree and extent of soil and ground water contamination. In 1999, over 4,400 tons of petroleum-contaminated soil was excavated at the site. Since then, numerous rounds of ground water samples have been collected from the various ground water monitoring wells. A potable well survey was conducted. No potable wells were identified that could potentially be affected by the ground water contamination.

Ground water contamination that appears to have originated on my property migrated easterly onto the North Central Power property as shown in the attached site map. The levels of benzene and certain other volatile organic compounds in the ground water on your property are above the state ground water enforcement standards found in chapter NR 140, Wisconsin Administrative Code. However, the environmental consultants who investigated this contamination informed me that this ground water contaminant plume is stable or receding and will naturally degrade over time. I believe that allowing natural attenuation to complete the cleanup at this site will meet the requirements for case closure that are found in chapter NR 726, Wisconsin Administrative Code, and I will be requesting that the WDNR accept natural attenuation as the final remedy for this site and grant case closure. Closure means that the WDNR will not be requiring any further investigation or cleanup action to be taken, other than the reliance on natural attenuation. A copy of a "Fact Sheet" prepared by the WDNR pertaining to natural attenuation is enclosed.

Because the source of the ground water contamination is not on the North Central Power property, neither you nor any subsequent owner of this property will be held responsible for investigation or cleanup of this ground water contamination, as long as you and any subsequent owners comply with the requirements of Section 292.13, Wisconsin Statutes, including allowing access to CTH W right-of-way for environmental investigation or cleanup if access is required. For further information on the

requirements of Section 292.13, Wisconsin Statutes, you may call (800) 367-6076 for calls originating in Wisconsin, or (608) 264-6020 if you are calling from out of state or within the Madison area, to obtain a copy of the Department of Natural Resources' publication #RR-589, *Fact Sheet 10: Guidance for Dealing with Properties Affected by Off-Site Contamination*.

The WDNR will not review my closure request for at least 30 days after the date of this letter. As an affected property owner, you have a right to contact the WDNR to provide any technical information you may have that indicates closure should not be granted for this site. If you would like to submit any information to the WDNR that is relevant to this closure request, you should mail that information to Ms. Janet Kazda at the address given below.

If this case is closed, all properties within the site boundaries where ground water contamination exceeds chapter NR 140 ground water enforcement standards will be listed on the Department of Natural Resources' geographic information system (GIS) Registry of Closed Remediation Sites. The information on the GIS Registry includes maps showing the location of properties in Wisconsin where ground water contamination above chapter NR 140 enforcement standards was found at the time that the case was closed. This GIS Registry will be available to the general public on the Department of Natural Resources' Internet website. Please review the enclosed site map of the impacted property, and notify me within the next 30 days if it is incorrect.

If you or any subsequent property owner wishes to construct or reconstruct a well on this property, special well construction standards may be necessary to protect the well from the residual ground water contamination. Any well driller who proposes to construct a well on this property in the future will first need to call Diggers Hotline (1-800-242-8511) if your property is located outside of the service area of a municipally owned water system, or contact the Drinking Water program within the Department of Natural Resources if the property is located within the designated service area of a municipally owned water system, to determine if there is a need for special well construction standards.

When the WDNR makes a decision on my closure request, it will be documented in a letter. If the WDNR grants closure, you may obtain a copy of this letter by requesting a copy from me, by writing to the WDNR address given below, or by accessing the DNR GIS Registry of Closed Remediation Sites on the Internet at [www.dnr.state.wi.us/org/at/et/geo/gwur](http://www.dnr.state.wi.us/org/at/et/geo/gwur). A copy of the closure letter is included as part of the site file on the GIS Registry of Closed Remediation Sites.

If you need more information, you may contact me at the above address or call me at (715) 266-2533. You may also contact Ms. Kazda at the WDNR. Her address is Wisconsin Department of Natural Resources, 107 Sutliff Avenue, Rhinelander, WI 54501 and her telephone number is (715) 365-8990.

Sincerely,

  
Al Denenny
