Subject: **PROGRESS REPORT and CHANGE ORDER**

- Install replacement water well
- Ground Water Sampling

Webster Pig Farm
Gilman, Wisconsin
PECFA No. 54433-9429-94
DNR BRRTS Nos. 03-61-000650
Meridian No. 05F784

Dear Carrie:

This letter summarizes the work completed at the above referenced site in 2015 and 2016.

- Installed replacement water well
- Ground Water Sampling

Based on the results of this work, we recommend the replacement well water supply at the Krizan property (W16653 CTH M) be sampled quarterly for four quarters. In addition, we recommend the monitoring well network be sampled twice (semi-annually). After the year of monitoring is completed, the site should be submitted for Closure with GIS Registry for Soil and Ground Water.

The remainder of this letter report summarizes the work completed, our recommendations, and a Change Order for the proposed work.

This letter report provides a summary of recent work and references earlier work described in file reports. The reader is referred to file reports for further information regarding the site.

RECENT WORK

Install Replacement Water Well at Krizan property (W16653 CTH M)

Please recall the water supply well at the Krizan property (fka Ruth Diamond property) was impacted with petroleum. Several replacement wells were installed until a permanent water supply well was installed in 1998. This well provided clean water but the production was very low.

Therefore, a replacement well with better production was installed at the northwest corner of the property (Figure 1). The well location and construction design was determined by first pumping existing wells in the vicinity (i.e., Stangret well, Pig Farm well, Town Hall well, and the Krizan well). This determined the most productive well depth was between 40 and 50 ft below grade.

The property boundaries were then marked in the field by a Registered Land Surveyor. The replacement well location was chosen at the farthest point away from the contaminant plume.

The well was installed October 7, 2016 by Kramer Well Drilling; the well log is provided in Appendix A. The new well produces 10 gpm. Two water samples were collected from the well on October 7 and October 8 and analyzed for VOCs. The lab report is provided in Appendix B and summarized in Table 1.

The well was connected to the house November 10, 2016. The well appears to produce adequate water for the house. More sampling is needed to confirm the water quality.

Ground Water Sampling

The monitoring wells were sampled four times (September 9, December 9, 2015; March 31, June 21, 2016). The lab report is provided in Appendix B and summarized in Table 1. Natural attenuation parameters were measured during each sampling event (Table 2). The ground water levels were measured during each sampling event (Table 3).

The ground water sampling data indicates a plume of impacted ground water extends from the property known as W16640 CTH M (aka former “Webster Pig Farm”)(Figure 1). The downgradient extent appears to be near MW-400/P-400 nest based on the concentrations in Table 1.

The natural attenuation data (Table 2) supports this interpreted extent. For example, the dissolved oxygen concentrations in MW-400 tend to be lower suggesting biological depletion (of dissolved oxygen). In addition, the conductivity is elevated downgradient in P-300 and P-400 suggesting downgradient impacts.

Further sampling is warranted to monitor the plume as the new well continues to be used (and possibly affect ground water flow and plume geometry).

CONCLUSIONS AND RECOMMENDATIONS

The replacement well is providing adequate water supply. However, due to the nearby ground water contamination, the ground water quality in the new well and monitoring well network should be monitored for at least one year to determine whether use of this well will draw impacted ground water toward the replacement well.

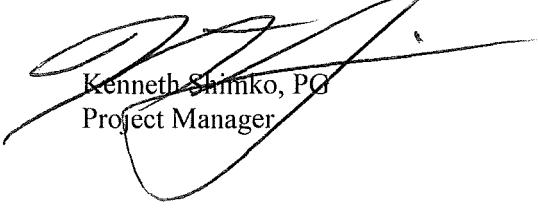

We recommend the replacement well water supply be sampled quarterly for four quarters (PVOC+Naph). The monitoring well network should be sampled twice (semi-annual) (PVOC+Naph) to monitor the plume geometry.

At the end of the year of monitoring, the site should be submitted for Closure with GIS Registry.

A Change Order for this work is included with this letter report.

Please contact me with any comments or questions.

Sincerely,
MERIDIAN ENVIRONMENTAL CONSULTING, LLC

Kenneth Shinko, P.G.
Project Manager

Fall Creek, WI 54742

RE: Project: WEBSTER PIG FARM
Pace Project No.: 40130211

Dear Kenneth Shimko:

Enclosed are the analytical results for sample(s) received by the laboratory on April 05, 2016. The results relate only to the samples included in this report. Results reported herein conform to the most current TNI standards and the laboratory's Quality Assurance Manual, where applicable, unless otherwise noted in the body of the report.

If you have any questions concerning this report, please feel free to contact me.

Sincerely,

Brian Basten

PROJECT NARRATIVE

Project: WEBSTER PIG FARM

Pace Project No.: 40130211

Method: WI MOD GRO

Description: WIGRO GCV

Client: Meridian Environmental Consulting, LLC

Date: April 08, 2016

General Information:

14 samples were analyzed for WI MOD GRO. All samples were received in acceptable condition with any exceptions noted below or on the chain-of custody and/or the sample condition upon receipt form (SCUR) attached at the end of this report.

Hold Time:

The samples were analyzed within the method required hold times with any exceptions noted below.

Initial Calibrations (including MS Tune as applicable):

All criteria were within method requirements with any exceptions noted below.

Continuing Calibration:

All criteria were within method requirements with any exceptions noted below.

Surrogates:

All surrogates were within QC limits with any exceptions noted below.

Method Blank:

All analytes were below the report limit in the method blank, where applicable, with any exceptions noted below.

Laboratory Control Spike:

All laboratory control spike compounds were within QC limits with any exceptions noted below.

Matrix Spikes:

All percent recoveries and relative percent differences (RPDs) were within acceptance criteria with any exceptions noted below.

QC Batch: GCV/15877

A matrix spike and/or matrix spike duplicate (MS/MSD) were performed on the following sample(s): 40130115002

M1: Matrix spike recovery exceeded QC limits. Batch accepted based on laboratory control sample (LCS) recovery.

- MS (Lab ID: 1315648)
- Toluene

Additional Comments:

This data package has been reviewed for quality and completeness and is approved for release.

REPORT OF LABORATORY ANALYSIS

This report shall not be reproduced, except in full,

without the written consent of Pace Analytical Services, Inc..

QUALIFIERS

Project: WEBSTER PIG FARM
Pace Project No.: 40130211

DEFINITIONS

DF - Dilution Factor, if reported, represents the factor applied to the reported data due to dilution of the sample aliquot.
ND - Not Detected at or above LOD.
J - Estimated concentration at or above the LOD and below the LOQ.
LOD - Limit of Detection adjusted for dilution factor and percent moisture.
LOQ - Limit of Quantitation adjusted for dilution factor and percent moisture.
S - Surrogate
1,2-Diphenylhydrazine decomposes to and cannot be separated from Azobenzene using Method 8270. The result for each analyte is a combined concentration.
Consistent with EPA guidelines, unrounded data are displayed and have been used to calculate % recovery and RPD values.
LCS(D) - Laboratory Control Sample (Duplicate)
MS(D) - Matrix Spike (Duplicate)
DUP - Sample Duplicate
RPD - Relative Percent Difference
NC - Not Calculable.
SG - Silica Gel - Clean-Up
U - Indicates the compound was analyzed for, but not detected at or above the adjusted LOD.
N-Nitrosodiphenylamine decomposes and cannot be separated from Diphenylamine using Method 8270. The result reported for each analyte is a combined concentration.
Pace Analytical is TNI accredited. Contact your Pace PM for the current list of accredited analytes.
TNI - The NELAC Institute.

LABORATORIES

PASI-G Pace Analytical Services - Green Bay

ANALYTE QUALIFIERS

M1 Matrix spike recovery exceeded QC limits. Batch accepted based on laboratory control sample (LCS) recovery.

RE: Project: WEBSTER PIG FARM
Pace Project No.: 40134244

Dear Kenneth Shimko:

Enclosed are the analytical results for sample(s) received by the laboratory on June 23, 2016. The results relate only to the samples included in this report. Results reported herein conform to the most current TNI standards and the laboratory's Quality Assurance Manual, where applicable, unless otherwise noted in the body of the report.

If you have any questions concerning this report, please feel free to contact me.

Sincerely,

Brian Basten

PROJECT NARRATIVE

Project: WEBSTER PIG FARM

Pace Project No.: 40134244

Method: WI MOD GRO

Description: WIGRO GCV

Client: Meridian Environmental Consulting, LLC

Date: June 29, 2016

General Information:

14 samples were analyzed for WI MOD GRO. All samples were received in acceptable condition with any exceptions noted below or on the chain-of custody and/or the sample condition upon receipt form (SCUR) attached at the end of this report.

Hold Time:

The samples were analyzed within the method required hold times with any exceptions noted below.

Initial Calibrations (including MS Tune as applicable):

All criteria were within method requirements with any exceptions noted below.

Continuing Calibration:

All criteria were within method requirements with any exceptions noted below.

Surrogates:

All surrogates were within QC limits with any exceptions noted below.

Method Blank:

All analytes were below the report limit in the method blank, where applicable, with any exceptions noted below.

Laboratory Control Spike:

All laboratory control spike compounds were within QC limits with any exceptions noted below.

Matrix Spikes:

All percent recoveries and relative percent differences (RPDs) were within acceptance criteria with any exceptions noted below.

QC Batch: GCV/16206

A matrix spike and/or matrix spike duplicate (MS/MSD) were performed on the following sample(s): 40134248018

M1: Matrix spike recovery exceeded QC limits. Batch accepted based on laboratory control sample (LCS) recovery.

- MS (Lab ID: 1356453)
- Toluene

Additional Comments:

Analyte Comments:

QC Batch: GCV/16206

D3: Sample was diluted due to the presence of high levels of non-target analytes or other matrix interference.

- P-600 (Lab ID: 40134244010)
- a,a,a-Trifluorotoluene (S)

This data package has been reviewed for quality and completeness and is approved for release.

QUALIFIERS

Project: WEBSTER PIG FARM

Pace Project No.: 40134244

DEFINITIONS

DF - Dilution Factor, if reported, represents the factor applied to the reported data due to dilution of the sample aliquot.

ND - Not Detected at or above LOD.

J - Estimated concentration at or above the LOD and below the LOQ.

LOD - Limit of Detection adjusted for dilution factor and percent moisture.

LOQ - Limit of Quantitation adjusted for dilution factor and percent moisture.

S - Surrogate

1,2-Diphenylhydrazine decomposes to and cannot be separated from Azobenzene using Method 8270. The result for each analyte is a combined concentration.

Consistent with EPA guidelines, unrounded data are displayed and have been used to calculate % recovery and RPD values.

LCS(D) - Laboratory Control Sample (Duplicate)

MS(D) - Matrix Spike (Duplicate)

DUP - Sample Duplicate

RPD - Relative Percent Difference

NC - Not Calculable.

SG - Silica Gel - Clean-Up

U - Indicates the compound was analyzed for, but not detected at or above the adjusted LOD.

N-Nitrosodiphenylamine decomposes and cannot be separated from Diphenylamine using Method 8270. The result reported for each analyte is a combined concentration.

Pace Analytical is TNI accredited. Contact your Pace PM for the current list of accredited analytes.

TNI - The NELAC Institute.

LABORATORIES

PASI-G Pace Analytical Services - Green Bay

ANALYTE QUALIFIERS

D3 Sample was diluted due to the presence of high levels of non-target analytes or other matrix interference.

M1 Matrix spike recovery exceeded QC limits. Batch accepted based on laboratory control sample (LCS) recovery.

RE: Project: WEBSTER PIG FARM
Pace Project No.: 40139827

Dear Kenneth Shimko:

Enclosed are the analytical results for sample(s) received by the laboratory on October 11, 2016. The results relate only to the samples included in this report. Results reported herein conform to the most current, applicable TNI/NELAC standards and the laboratory's Quality Assurance Manual, where applicable, unless otherwise noted in the body of the report.

If you have any questions concerning this report, please feel free to contact me.

Sincerely,

Brian Basten

PROJECT NARRATIVE

Project: WEBSTER PIG FARM

Pace Project No.: 40139827

Method: EPA 8260

Description: 8260 MSV

Client: Meridian Environmental Consulting, LLC

Date: October 18, 2016

General Information:

3 samples were analyzed for EPA 8260. All samples were received in acceptable condition with any exceptions noted below or on the chain-of custody and/or the sample condition upon receipt form (SCUR) attached at the end of this report.

Hold Time:

The samples were analyzed within the method required hold times with any exceptions noted below.

Initial Calibrations (including MS Tune as applicable):

All criteria were within method requirements with any exceptions noted below.

Continuing Calibration:

All criteria were within method requirements with any exceptions noted below.

Internal Standards:

All internal standards were within QC limits with any exceptions noted below.

Surrogates:

All surrogates were within QC limits with any exceptions noted below.

Method Blank:

All analytes were below the report limit in the method blank, where applicable, with any exceptions noted below.

Laboratory Control Spike:

All laboratory control spike compounds were within QC limits with any exceptions noted below.

QC Batch: 238103

L0: Analyte recovery in the laboratory control sample (LCS) was outside QC limits.

- LCS (Lab ID: 1410581)
 - Chloroethane
 - Vinyl chloride

Matrix Spikes:

All percent recoveries and relative percent differences (RPDs) were within acceptance criteria with any exceptions noted below.

QC Batch: 238103

A matrix spike and/or matrix spike duplicate (MS/MSD) were performed on the following sample(s): 40139827001

M0: Matrix spike recovery and/or matrix spike duplicate recovery was outside laboratory control limits.

- MS (Lab ID: 1412037)
 - Chloroethane
 - Vinyl chloride
- MSD (Lab ID: 1412038)
 - Chloroethane
 - Vinyl chloride

REPORT OF LABORATORY ANALYSIS

This report shall not be reproduced, except in full,
without the written consent of Pace Analytical Services, LLC.

QUALIFIERS

Project: WEBSTER PIG FARM

Pace Project No.: 40139827

DEFINITIONS

DF - Dilution Factor, if reported, represents the factor applied to the reported data due to dilution of the sample aliquot.

ND - Not Detected at or above LOD.

J - Estimated concentration at or above the LOD and below the LOQ.

LOD - Limit of Detection adjusted for dilution factor and percent moisture.

LOQ - Limit of Quantitation adjusted for dilution factor and percent moisture.

S - Surrogate

1,2-Diphenylhydrazine decomposes to and cannot be separated from Azobenzene using Method 8270. The result for each analyte is a combined concentration.

Consistent with EPA guidelines, unrounded data are displayed and have been used to calculate % recovery and RPD values.

LCS(D) - Laboratory Control Sample (Duplicate)

MS(D) - Matrix Spike (Duplicate)

DUP - Sample Duplicate

RPD - Relative Percent Difference

NC - Not Calculable.

SG - Silica Gel - Clean-Up

U - Indicates the compound was analyzed for, but not detected at or above the adjusted LOD.

N-Nitrosodiphenylamine decomposes and cannot be separated from Diphenylamine using Method 8270. The result reported for each analyte is a combined concentration.

Pace Analytical is TNI accredited. Contact your Pace PM for the current list of accredited analytes.

TNI - The NELAC Institute.

LABORATORIES

PASI-G Pace Analytical Services - Green Bay

ANALYTE QUALIFIERS

L0 Analyte recovery in the laboratory control sample (LCS) was outside QC limits.

L1 Analyte recovery in the laboratory control sample (LCS) was above QC limits. Results may be biased high.

L3 Analyte recovery in the laboratory control sample (LCS) exceeded QC limits. Analyte presence below reporting limits in associated samples. Results unaffected by high bias.

M0 Matrix spike recovery and/or matrix spike duplicate recovery was outside laboratory control limits.
