Subject: Port Wing Report review
Attachments: 20171017074419878.pdf

Hi Jason, I just finished reviewing the Port Wing letter report. Just a couple of comments. Attached is the extent of soil contamination, excavation area and groundwater flow figures. The extent of soil contamination should reflect lab results. It does not appear as though the soil contamination extends as far as it is presented. Some of the lines should be dotted instead of solid. I would recommend updating this figure. Also, the contours of the GW flow map look strange (not enough points to accurately depict contours), but this can wait until we have more data. If you have any questions, let me know. Thanks, Carrie
