RE: DNR ID# (BRRTS#) 03-27-000811 Contamination Case Closure

The Village of Hixton requests the DNR to deny case closure on the contamination issue at 108 S Sechlerville Rd. The current owner of said property was aware of the contamination issue when he made the purchase, which was made at a greatly reduced price due, at least in part, to the contamination. We therefore believe the owner of the origin of contamination should be responsible and bear future responsibility for any continuing obligations as a result of residual contamination.
