Hi Mackenzie,
The items listed were all done with a previous environmentalist and Ron Anderson. Could you please reach out to Ron Anderson, and let him know exactly what we need to get done to close this case.
The technical aspects of a job like this are a bit out of my wheelhouse, so since we have previously worked with Ron he might be a better choice.

Hi Sal,

Both the properties to the north and south have closed DNR sites and no additional work is needed from their respective responsible parties.

We are committed to service excellence.

Hi Mackenzie,

Thank you for reaching out to us. I did speak with Ron Anderson and we reviewed the situation. I would like to resolve this, however the amount of money required to finance this is not feasible for me at this time. I will keep this under advisement for the future. Can you please let me know what our neighbors in the area are doing to assist in resolving this issue as well? To our south is a storage facility which used to be a tannery, and to the north is an industrial laundry processing plant. This will help me to determine the best course of action on my end.

Hi Sal,

We have reviewed the past records for the site and have determined that additional actions are needed, as noted in the May 6, 2024, letter.

Thanks,
Mackenzie

Hello Mackenzie,

If you can review past records, I had hired a company to investigate the situation. We did do a phase I, a Phase II, and a Phase III. After spending over \$60,000 and valuable time it was determined that because I am between two contaminated areas (To the south of me was a tannery and to the north of me is a laundry service) that it was not economically feasible to clean up, and it would evaporate into the air eventually per your predecessor.

Good morning,

I am the new project manager for the DNR BRRS Site, MSF Corp. Attached is a letter requesting a status update.

Thank you,

Mackenzie
