Subject: June 12, 2019 Trent Tube PCB Soil Sampling and AOC Material Characterization Plan

Dear Mr. Hedinger:

The Department has reviewed the proposed GZA GeoEnvironmental Trent Tube soil sampling plan. As presented the Department approves the workplan and field work can be started on your schedule. The Department understands this work is planned for mid July 2019. It is understood the PCB parameter list will include the same congeners as tested for in earlier investigations and will include: PCB 1016, 1221, 1232, 1242, 1248, 1254 and 1260. Further it is understood the sample locations will vary slightly from mapped locations based on field conditions.

If you have questions about this approval, please contact me directly.

Sincerely,

A handwritten signature in cursive script that reads 'R. Michael Schmoller'.
