Re: Groundwater Remediation Scope of Work and Temporary Exemption
Request for Groundwater Remedial Action
Former Trent Tube Plant No. 1, 2188 Church St., East Troy, WI
BRRTS # 02-65-245827

Dear Mr. Hedinger:

The Department of Natural Resources (Department) has reviewed the subject Scope of Work dated July 21, 2020. This document presents a plan for full-scale groundwater remediation of chlorinated VOCs using enhanced reductive dichlorination that involves injection of an emulsified vegetable oil (EVO) product, an oxygen scavenger and active biological cultures into the aquifer underlying the site.

The Department approves this plan as written. As indicated in previous e-mails from David Haas, the General WPDES Permit previously obtained for this site is still active and you may operate under that permit.

Please feel free to contact me with any questions or comments by phone at 608-293-0112 or via e-mail at stevenl.martin@wisconsin.gov.

Sincerely,

A handwritten signature in blue ink, appearing to read 'St L Martin'.

Steven L. Martin, P.G.
South Central Region Team Supervisor
Remediation and Redevelopment Program
