Hi Wayne,

There isn't a map or an insert map for the Cross-Section Map B.3.a showing where A-A' is located at. Just send me the map or maps by PDF. DNR will have meeting on this closure as soon as I can schedule it in. Schedules are pretty full at the moment. Because of the current situation.

Stay healthy.

J,

The updated closure package with revised figures B.2.a, B.2.b, D.1 and D.2 has been uploaded to the portal. Please reply to confirm you can access it for review with the committee.

Thanks,

Hi Wayne,

Hope you're doing just fine.

I quickly went through the last case closure submittal dated March 13, 2020. It looks like 4 of the maps need to be changed. B.2.a., B.2.b., D.1 and D.2. The maps indicate hydrocarbon extents, not CVOCs. They're in the packet (B.2.a & B.2.b, Pages 65 & 66), cap plan (D.1 & D.2, Pages 101 & 102) and ROW owners. (B.2.a, Pages 225 & 230).

I don't think you'll have to resend the notification to the ROW owners. I think I have to send them letters at the end, so we can make the corrections later. I'll have to check on this and let you know.

J:

I thought you were funning me, since chlorinated compounds are also “hydrocarbons”. However, I see what you mean. There could be confusion especially since the narrative discusses the initial discovery of petroleum compounds and describes where the petroleum impacts occurred. I am having Brian check into this and see how best to correct.

Wayne,

I have to review the file and the latest case closure packet and get back with Pam on this. The EPA's will check to see if all the documents have been uploaded to our efile site for this case. I should get the review done in a week or week and a half, have a discussion with Pam on the next step. I'll let you know.

J: Yes, you approved change order #7 for installation of a totalizing flow meter. What I am asking about is the revised closure package. Brian revised the closure documentation to update the vapor mitigation plan to address the SVE system modifications due to the basement sump needing to be operated. He also addressed other issues that you had at that time. The revised closure document was sent electronically to you on March 16th. Only an electronic copy was sent per your communications with Brian that this would be adequate. I believe the idea was that if the closure request was approved, then we would send a final hard copy.
