Eland WI 54427

**SUBJECT:** Department Withdrawal of Case Closure Request  
Eppler's Bar, 1693 STH 49, Eland, Wisconsin  
DNR BRRTS # 03-37-000954

Dear Mr. Eppler:

The Wisconsin Department of Natural Resources (the "Department") received an incomplete case closure request for the above referenced case. The information required to complete the Request was provided in an email dated July 3, 2017, which were sent to you and your consultant (see attached).

More than 60 days have passed and the Department still has not received the necessary information from you or your consultant. Therefore, the Department cannot start a technical review of the case closure request, and your case has been administratively withdrawn.

As such, you will be required to submit a new case closure request package. The new closure request will need to address the deficiencies outlined in the emails, and meet the requirements of ch. NR 700 series and ch. NR 140, Wis. Adm. Code, in effect at the time of the resubmittal. Upon receiving a complete case closure request, the Department will review this site for case closure.

If you have any questions or concerns, please feel free to contact me at 715-421-7862 or by email at [Dee.Lance@wisconsin.gov](mailto:Dee.Lance@wisconsin.gov).

Sincerely,

Dee Lance  
Hydrogeologist  
Remediation & Redevelopment Program

Enclosure: Email

**Cc:** Kinney, Deena - DNR  
**Subject:** WDNR Case Closure - GIS Registry Form 4400-202 for 03-37-000954 Acknowledgement

This email confirms on 06/13/2017 the Wisconsin Department of Natural Resources (DNR) Remediation and Redevelopment (RR) Program received Case Closure - GIS Registry Form 4400-202 (R 08/16) with fee(s) for:

03-37-000954 EPPLERS BAR  
1693 STH 49, ELDERON  
PECFA No. 54427-9445-93

The Project Manager conducted an initial Administrative Review of your submittal on 07/03/2017 and determined the following items and/or attachment(s) are missing, incorrect or incomplete:

(A1): All required fees have been paid

(Attachment A)(2): Soil Analytical Results Table(s) PM Comment: Table A.2.c. & d. Summary of Soil Analytical Results need to identify if the sample was obtained in saturated or unsaturated soils.

(Attachment A)(3): Residual Soil Contamination Table(s) PM Comment: Need to identify if the sample was obtained in saturated or unsaturated soils.

The Department does not consider your closure request complete, nor will the PM begin the technical review of your request, until the deficiencies listed above are corrected. Our regional Closure Committees typically meet on the first Thursday of each month. Please keep this date in mind for your future planning.

You may contact DNR Project Manager DEE LANCE at [dee.lance@wisconsin.gov](mailto:dee.lance@wisconsin.gov) or (715) 421-7862 with any questions.
