Good Afternoon Dee,

Please see attached edits that I believe have made all the changes as requested.

Subject: Epplers Bar 03-37-000954

Hi Guys,

The good news is once all of the items listed below are completed and scanned into me, a Remaining Actions Notice can be written. So...

1. Remove green shading around GP-8 on the soils map – B.2.b & B.4.a.
2. Where is excavation soil sample CSS 11? Is it possibly under the green shading at GP-8 so the wording will then appear after the shading is gone?
3. Tables need to be modified to include Indust & Non-Indust standards.
4. Soil tables need to have the samples identified with Saturated or Unsaturated.
5. On page 3 at Section 3.A.iii remove the wording for the structural impediment.
6. Remove the X for the source property with regard to the structural impediment.
7. Section 4.A – State there were 518 tons removed.

Thanks

We are committed to service excellence.

Visit our survey at <http://dnr.wi.gov/customersurvey> to evaluate how I did.
