RE: Site Investigation Report Directives  
Bayside Forestry Equipment, Inc.,  
9222 E County Rd L, Solon Springs  
DNR BRRTS # 03-16-000971

Dear Mr. Keseluk:

On April 28, 2017, the Wisconsin Department of Natural Resources (Department) received a Site Investigation Report from REI Engineering, Inc, for the site referenced above. The Department has determined that the following activities are necessary:

As discussed with your consultant on July 11, 2017 additional work is needed to define the degree and extent of petroleum contamination.

- Need to define the degree and extent of groundwater contamination downgradient and side-gradient of the estimated plume with additional groundwater monitoring.
- Additional site investigation is needed to assess whether or not vapor intrusion is a concern, or if there is a risk of future exposure potential due to residual contamination beneath or near the building.
- Additional cross sections to show the onsite potable well and adjacent property potable wells and well screens and contamination.

Thank you for your efforts to protect Wisconsin's environment. If you have any questions, please contact me in writing at the letterhead address or by telephone at (608) 261-6543.

Sincerely,

Ralph N. Smith  
Hydrogeologist
