Subject: RE: Nep's Bar - post excavation gw sampling - Moquah, WI 03-04-000980

Based on email correspondence below we are requesting the following:

Remove - 36 PVOC+Naph gw samples @ \$30.35/sample = \$1,092.60

Add – 36 PVOC+Naph+1,2-DCA gw samples @ \$43.79/sample = \$1,576.44

Thus, we are requesting an additional **\$483.84** to sample all wells for 4 rounds for PVOC+Naph+1,2-DCA.
Any questions let me know.
Thanks,

Jason Powell

Hi Jason, I would sample all wells for 1,2 DCA-bases covered then. Please submit a cost request via email and I will put a note in Tracker upon discussion with Chris. Thanks, Carrie

Subject: Nep's Bar - post excavation gw sampling - Moquah, WI 03-04-000980

Carrie, I am preparing for the first post-excavation gw sampling event and noticed that we have PVOC+Naphthalene approved for all the gw sampling events. However, source monitoring well MW-1 has had NR140 ES exceedences for 1,2-DCA and all other wells including the private well have been no detect for 1,2-DCA.

Would it be best to change all the sampling to PVOC+Naphthalene+1,2-DCA or to only sample MW-1R for that analysis and the rest of the wells sample for PVOC+Naph?

Either way a note will have to be added changing all 36 samples or just 4 samples to include 1,2-DCA. Costs for PVOC+Naphthalene are \$30.35/sample and PVOC+Naph+1,2-DCA are \$43.79/sample.

I have the sampling set up for next week Tuesday Feb. 20th.

Any questions let me know.

Thanks,

Jason Powell
