Carrie...

I received this email today concerning Neps Bar. They would like costs approved to replace the electrical line between the building and beer sign per it being disconnected per the remedial excavation project.

I know you have considered this issue before, but based on this info would it be possible for the pecfa fund to cover the costs of replacing this electrical line?

Can you please respond to all...thanks!! ron

Ron:

The following is a blue print of Nep's tavern in Moquah WI. It show the underground buried power line to the grain belt sign.

After dirt work was completed sign no longer worked. Sign is good just no power to it.

Pete.

Power line shown on blue print runs from garage to beer sign by Co. Hwy G. This is the area where they were digging. Beer sign was working before they started digging and ~~now it isn't~~ wasn't working after they were finished.

- NOTE: INFORMATION BASED ON AVAILABLE DATA. ACTUAL CONDITIONS MAY DIFFER
- ◆ - UST CLOSURE SOIL SAMPLING LOCATION
 - - GEOPROBE BORING LOCATION
 - ⊗ - POTABLE WELL LOCATION
 - ⊕ - PROPOSED MONITORING WELL LOCATION

- - BURIED ELECTRIC LINE
- - TELEPHONE
- ==== - OVERHEAD ELECTRIC LINE
- - PROPERTY LINE

SCALE:
1 INCH = 30 FEET

In reference to the Outside Beer Sign. The breakers and Bulbs in the sign both check out ok. There is no live power in the line where they dug that leads to the Beer Sign.

Good morning...

This is per our emails on May 22nd about damage at the Neps Bar per the excavation project.

The attached pictures are from our client and an estimate for repairs is below.

We can send a Cost Cap Exceedence request, but wanted to get your feedback prior to putting it together.

thanks!! ron
