**Subject: Close - Out of National Presto Industries' Leaking Underground Storage Tank
Site # 03-09-001038**

Dear Mr. Nauman:

Mr. Cliff Wright, Gannett Fleming, has submitted the abandonment forms for the sparge and vent wells that were abandoned at the National Presto Industries' Leaking Underground Storage Tank Site. In addition, he included a request to transfer the four (4) groundwater monitoring from this project to another active project at this site. This transfer is contingent on maintaining these wells in compliance with NR 141, Wisconsin Administrative Code.

This site is now closed and the above-captioned wells have been transferred to the active remediation project at this site.

If you have any questions concerning this letter, please contact me at (715) 839-3775.

Sincerely,

John R. Grump
Hydrogeologist
