Mr. Ray Rogus  
R&R Transmission Specialists  
731 8<sup>th</sup> Street South  
Wisconsin Rapids, WI 54494

**KEEP THIS LEGAL DOCUMENT WITH YOUR PROPERTY RECORDS**

**SUBJECT:** Case Closure with Continuing Obligations  
Former Normington Dry Cleaners, 821 Chestnut Street, Wisconsin Rapids, 54494  
BRRTS #: 02-72-257528, FID #: 772014650

Dear Mr. Rogus:

The Wisconsin Department of Natural Resources (DNR) is pleased to inform you that the Normington Dry Cleaners Former WI Rapids case identified above met the requirements of Wisconsin Administrative (Wis. Admin.) Code chs. NR 700 to 799 for case closure with continuing obligations (COs). COs are legal requirements to address potential exposure to remaining contamination. No further investigation or remediation is required at this time for the reported hazardous substance discharge and/or environmental pollution.

However, you, future property owners and occupants of the property must comply with the COs as explained in this letter, which may include maintaining certain features and notifying the DNR and obtaining approval before taking specific actions. You must provide this letter and all enclosures to anyone who purchases, rents, or leases this property from you. Some COs also apply to other properties or rights of way (ROWs) affected by the contamination as identified in the Continuing Obligation Summary section of this letter.

This case closure decision is issued under Wis. Admin. Code chs. NR 700 to 799 and is based on information received by the DNR to date. The DNR reviewed the case closure request for compliance with state laws and standards and determined the case closure request met the notification requirements of Wis. Admin. Code ch. NR 725, the response action goals of Wis. Admin. Code § NR 726.05(4), and the case closure criteria of Wis. Admin. Code §§ NR 726.05, 726.09 and 726.11, and Wis. Admin. Code ch. NR 140.

The Normington Dry Cleaners Former WI Rapids site was investigated for a discharge of hazardous substances and/or environmental pollution from historic use of tetrachloroethylene (PCE) as a dry-cleaning solvent. Case closure is granted for the contaminants that were associated with the hazardous substance discharge and/or environmental pollution as documented in the case file. The site investigation and/or remedial action addressed soil, groundwater, and vapors. The remedial action consisted of long term monitored nature attenuation. Contamination remains in soil at the former dry cleaner and in groundwater extending west of the source property as shown on the attached map, Figure B.3.B Groundwater Isoconcentration, 09/29/2022.

BRRTS #: 02-72-257528

May 25, 2023

The case closure decision and COs required are based on the current use of the source property at 821 Chestnut St for small commercial purposes, and the affected properties (listed in the table below) for commercial and residential purposes. The source property is currently zoned B2 – General Commercial, and the affected properties are currently zoned B2 - General Commercial, R2 – Mixed Residential, R3 – Multi-Family Medium Density Residential, and P1 – Park and Recreation. . Based on the land use and zoning, the site, including both the source property and the affected properties, meets the non-industrial land use classification under Wis. Admin. Code § NR 720.05(5) for application of residual contaminant levels in soil.

### SUMMARY OF CONTINUING OBLIGATIONS

COs are applied at the following locations:

ADDRESS (CITY, WI)	COS APPLIED	DATE OF MAINTENANCE PLAN(S)
821 Chestnut Street (Source Property)	Residual soil contamination Residual groundwater contamination	N/A
Off-site properties affected by groundwater contamination are listed in attached document	Residual groundwater contamination	N/A

### CLOSURE CONDITIONS

Closure conditions are legally required conditions which include both COs and other requirements for case closure (Wis. Stat. § 292.12(2)). Under Wis. Stat. § 292.12(5), you, any subsequent property owners and occupants of the property must comply with the closure conditions as explained in this letter. The property owner must notify occupants for any condition specified in this letter under Wis. Admin. Code §§ NR 726.15(1)(b) and NR 727.05(2). If an occupant is responsible for maintenance of any closure condition specified in this letter, you and any subsequent property owner must include the condition in the lease agreement under Wis. Admin. Code § NR 727.05(3) and provide the maintenance plan to any occupant that is responsible.

DNR staff may conduct periodic pre-arranged inspections to ensure that the conditions included in this letter are met (Wis. Stat. § 292.11(8)). If these requirements are not followed, the DNR may take enforcement action under Wis. Stat. ch. 292 to ensure compliance with the closure conditions.

### SOIL

#### *Continuing Obligations to Address Soil Contamination*

Residual Soil Contamination (Wis. Admin. Code chs. NR 718, NR 500 to 599, and § NR 726.15(2)(b) and Wis. Stat. ch. 289)

Soil contamination remains as indicated on the enclosed map (Figure B.2.b., Residual Soil Contamination, 12/21/2021). If soil in the location(s) shown on the map is excavated in the future, the property owner or right of way holder at the time of excavation must sample and analyze the excavated soil. If sampling confirms that contamination is present, the property owner or right of way holder at the time of excavation will need to determine if the material is considered solid waste and ensure that any storage, treatment or disposal complies with applicable standards and rules. Contaminated soil may be managed under Wis. Admin. Code ch. NR 718 with prior DNR approval.

In addition, all current and future property owners, occupants and right of way holders need to be aware that excavation of the contaminated soil may pose an inhalation and direct contact hazard; special precautions may be needed to prevent a threat to human health.

## **GROUNDWATER**

### *Continuing Obligations to Address Groundwater Contamination and/or Monitoring Wells*

#### Residual Groundwater Contamination (Wis. Admin. Code ch. NR 140 and § NR 812.09(4)(w))

Groundwater contamination which equals or exceeds the enforcement standards for tetrachloroethylene (PCE) and trichloroethylene (TCE) is present as shown on the enclosed map (Figure B.3.b., Groundwater Isoconcentration, 09/29/2022). To construct a new well or reconstruct an existing well, the property owner must obtain prior DNR approval. Additional casing may be necessary to prevent contamination of the well.

## **OTHER CLOSURE REQUIREMENTS**

#### Pre-Approval Required for Well Construction (Wis. Admin. Code § NR 812.09(4)(w))

DNR approval is required before well construction or reconstruction for all sites identified as having residual contamination and/or COs. This requirement applies to private drinking water wells and high capacity wells. To obtain approval, the property owner is required to complete and submit Form 3300-254, Continuing Obligations/Residual Contamination Well Approval Application, to the DNR Drinking and Groundwater program's regional water supply specialist. A well driller can help complete this form. The form can be obtained online at [dnr.wi.gov](http://dnr.wi.gov), search "3300-254." Additional casing may be necessary to help prevent contamination of the well.

#### General Wastewater Permits for Construction-related Dewatering Activities (Wis. Admin. Code ch. NR 200)

The DNR's Water Quality Program regulates point source discharges of contaminated water, including discharges to surface waters, storm sewers, pits, or to the ground surface. This includes discharges from construction-related dewatering activities, including utility work and building construction.

If the property owner or any other person plans to conduct such activities, that person must contact the Water Quality Program and, if necessary, apply for the required discharge permit. If residual soil or groundwater contamination is likely to affect water collected in a pit/trench that requires dewatering, a general permit for discharge of *Contaminated Groundwater from Remedial Action Operations* may be needed. If water collecting in a pit/trench that requires dewatering is expected to be free of pollutants other than suspended solids, oil and grease, a general permit for pit/trench *Dewatering Operations* may be needed. Additional information can be obtained by visiting the DNR website at "[dnr.wi.gov](http://dnr.wi.gov)," search "wastewater general permits."

## **DNR NOTIFICATION AND APPROVAL REQUIREMENTS**

Certain activities are limited at closed sites to maintain protectiveness to human health and the environment. The property owner is required to notify the DNR at least 45 days before and obtain approval from the DNR prior to taking the following actions (Wis. Admin. Code §§ NR 727.07, NR 726.15 (2), Wis. Stat. § 292.12(6)).

The DNR may require additional investigation and/or cleanup actions, if necessary, to be protective of human health and the environment. The case may be reopened under Wis. Admin. Code § NR 727.13 if additional information indicates that contamination on or from the site poses a threat, or for a lack of compliance with a CO or closure requirement.

### SUBMITTALS AND CONTACT INFORMATION

Site, case-related information and DNR contacts can be found online in the Bureau for Remediation and Redevelopment Tracking System (BRRTS) on the Web (BOTW); go to [dnr.wi.gov](http://dnr.wi.gov) and search “BOTW.” Use the BRRTS ID # found at the top of this letter. The site can also be found on the map view, Remediation and Redevelopment Sites Map (RRSM) by searching “RRSM.”

Send written notifications to the DNR using the RR Program Submittal Portal at [dnr.wi.gov](http://dnr.wi.gov), search “RR submittal portal” (<https://dnr.wi.gov/topic/Brownfields/Submittal.html>). Questions on using this portal can be directed to the environmental program associate (EPA) for the regional DNR office. Visit [dnr.wi.gov](http://dnr.wi.gov), search “RR contacts” and select the EPA tab (<https://dnr.wi.gov/topic/Brownfields/Contact.html>).

### CLOSING

The DNR appreciates your efforts to restore the environment at this site. If you have any questions regarding this letter, please contact DNR project manager Matt Thompson at (715) 492-2304 or [matthewa.thompson@wisconsin.gov](mailto:matthewa.thompson@wisconsin.gov).

Sincerely,

Trevor Nobile, P.G., CPG  
Field Operations Director  
Remediation & Redevelopment Program

Barbara Stevens  
921 Lincoln Street  
Wisconsin Rapids, WI 54994

SUBJECT: Notice of Completion of Response Actions at Former Normington Dry Cleaners  
821 Chestnut Street, Wisconsin Rapids, WI 54494  
BRRTS #: 02-72-257528, FID #: 772014650

Dear Barbara Stevens:

The Wisconsin Department of Natural Resources (DNR) recently approved the completion of the response actions conducted at the Former Normington Dry Cleaners site, located at 821 Chestnut Street (Site). This letter describes how that approval affects your property, parcel ID# 3407937. You are not required to take any action in response to this letter.

State remedial action laws found in Wisconsin Statute (Wis. Stat.) ch. 292 direct parties responsible for the discharge of a hazardous substance or environmental pollution to take necessary actions to restore the environment to the extent practicable and minimize harmful effects from the discharge to the air, lands, or waters of this state. The law allows some contamination to remain in the environment if it does not pose a threat to public health, safety, welfare, or the environment.

On 11/21/2021, you received information from Andrew Deforge, REI Engineering Inc., about the volatile organic compound contamination from the Site remaining in groundwater beneath your property. Over time, this contamination will naturally biodegrade on its own. Per Wis. Stat. § 292.13, you are not responsible for cleaning up contamination that has migrated beneath your property from the Site.

Your drinking water is not affected by the contamination. Your drinking water is provided by a municipal water supply system, which is routinely tested to ensure the water meets federal and state drinking water standards.

DNR approval is required under Wis. Admin. Code § NR 812.09 (4) (w) before well construction or reconstruction for all properties identified as having residual contamination. This requirement applies to private drinking water wells and high-capacity wells. To obtain approval, the property owner is required to complete and submit Form 3300-254, "Continuing Obligations/Residual Contamination Well Approval Application." The form should be submitted to the DNR Drinking Water and Groundwater Program's regional water supply specialist, identified by visiting [dnr.wi.gov](http://dnr.wi.gov), and searching "private water supply specialist." A well driller can help complete this form. The form can be obtained online at [dnr.wi.gov](http://dnr.wi.gov), search "3300-254." Additional casing may be necessary to help prevent contamination of the well.

Additional information about this case is available in the DNR's Bureau for Remediation and Redevelopment Tracking System (BRRTS) on the Web (BOTW) at [dnr.wi.gov](http://dnr.wi.gov), search "BOTW." Enter 02-72-257528 in the **activity number** field, then click **search**. Scroll down and click on the **CO Packet** link for information about the completion of the response actions. The Site may also be seen on the map viewer, RR Sites Map. RR Sites Map can be found online at [dnr.wi.gov](http://dnr.wi.gov) by searching "RRSM." If you cannot access BOTW or RR Sites Map, please contact the DNR project manager for information regarding this Site.

If you have questions or concerns regarding the Site or this letter, please contact Matt Thompson, the DNR Project Manager, at (715) 492-2304 or [matthewa.thompson@wisconsin.gov](mailto:matthewa.thompson@wisconsin.gov).

Sincerely,

Trevor Nobile, P.G., CPG

821 Chestnut Street, Wisconsin Rapids, WI 54494  
BRRTS #: 02-72-257528, FID #: 772014650

Dear John Turner:

The Wisconsin Department of Natural Resources (DNR) recently approved the completion of the response actions conducted at the Former Normington Dry Cleaners site, located at 821 Chestnut Street (Site). This letter describes how that approval affects your property, parcel ID# 3408338. You are not required to take any action in response to this letter.

State remedial action laws found in Wisconsin Statute (Wis. Stat.) ch. 292 direct parties responsible for the discharge of a hazardous substance or environmental pollution to take necessary actions to restore the environment to the extent practicable and minimize harmful effects from the discharge to the air, lands, or waters of this state. The law allows some contamination to remain in the environment if it does not pose a threat to public health, safety, welfare, or the environment.

On 11/26/2021, you received information from Andrew Deforge, REI Engineering Inc., about the volatile organic compound contamination from the Site remaining in groundwater beneath your property. Over time, this contamination will naturally biodegrade on its own. Per Wis. Stat. § 292.13, you are not responsible for cleaning up contamination that has migrated beneath your property from the Site.

Your drinking water is not affected by the contamination. Your drinking water is provided by a municipal water supply system, which is routinely tested to ensure the water meets federal and state drinking water standards.

DNR approval is required under Wis. Admin. Code § NR 812.09 (4) (w) before well construction or reconstruction for all properties identified as having residual contamination. This requirement applies to private drinking water wells and high-capacity wells. To obtain approval, the property owner is required to complete and submit Form 3300-254, "Continuing Obligations/Residual Contamination Well Approval Application." The form should be submitted to the DNR Drinking Water and Groundwater Program's regional water supply specialist, identified by visiting [dnr.wi.gov](http://dnr.wi.gov), and searching "private water supply specialist." A well driller can help complete this form. The form can be obtained online at [dnr.wi.gov](http://dnr.wi.gov), search "3300-254." Additional casing may be necessary to help prevent contamination of the well.

Additional information about this case is available in the DNR's Bureau for Remediation and Redevelopment Tracking System (BRRTS) on the Web (BOTW) at [dnr.wi.gov](http://dnr.wi.gov), search "BOTW." Enter 02-72-257528 in the **activity number** field, then click **search**. Scroll down and click on the **CO Packet** link for information about the completion of the response actions. The Site may also be seen on the map viewer, RR Sites Map. RR Sites Map can be found online at [dnr.wi.gov](http://dnr.wi.gov) by searching "RRSM." If you cannot access BOTW or RR Sites Map, please contact the DNR project manager for information regarding this Site.

If you have questions or concerns regarding the Site or this letter, please contact Matt Thompson, the DNR Project Manager, at (715) 492-2304 or [matthewa.thompson@wisconsin.gov](mailto:matthewa.thompson@wisconsin.gov).

Sincerely,

Trevor Nobile, P.G., CPG

Paul Klinkhammer  
5451 Grant Road  
Vesper, WI 54489

SUBJECT: Notice of Completion of Response Actions at Former Normington Dry Cleaners  
821 Chestnut Street, Wisconsin Rapids, WI 54494  
BRRTS #: 02-72-257528, FID #: 772014650

Dear Paul Klinkhammer:

The Wisconsin Department of Natural Resources (DNR) recently approved the completion of the response actions conducted at the Former Normington Dry Cleaners site, located at 821 Chestnut Street (Site). This letter describes how that approval affects your property, parcel ID# 3408341. You are not required to take any action in response to this letter.

State remedial action laws found in Wisconsin Statute (Wis. Stat.) ch. 292 direct parties responsible for the discharge of a hazardous substance or environmental pollution to take necessary actions to restore the environment to the extent practicable and minimize harmful effects from the discharge to the air, lands, or waters of this state. The law allows some contamination to remain in the environment if it does not pose a threat to public health, safety, welfare, or the environment.

On 12/2/2021, you received information from Andrew Deforge, REI Engineering Inc., about the volatile organic compound contamination from the Site remaining in groundwater beneath your property. Over time, this contamination will naturally biodegrade on its own. Per Wis. Stat. § 292.13, you are not responsible for cleaning up contamination that has migrated beneath your property from the Site.

Your drinking water is not affected by the contamination. Your drinking water is provided by a municipal water supply system, which is routinely tested to ensure the water meets federal and state drinking water standards.

DNR approval is required under Wis. Admin. Code § NR 812.09 (4) (w) before well construction or reconstruction for all properties identified as having residual contamination. This requirement applies to private drinking water wells and high-capacity wells. To obtain approval, the property owner is required to complete and submit Form 3300-254, "Continuing Obligations/Residual Contamination Well Approval Application." The form should be submitted to the DNR Drinking Water and Groundwater Program's regional water supply specialist, identified by visiting [dnr.wi.gov](http://dnr.wi.gov), and searching "private water supply specialist." A well driller can help complete this form. The form can be obtained online at [dnr.wi.gov](http://dnr.wi.gov), search "3300-254." Additional casing may be necessary to help prevent contamination of the well.

Additional information about this case is available in the DNR's Bureau for Remediation and Redevelopment Tracking System (BRRTS) on the Web (BOTW) at [dnr.wi.gov](http://dnr.wi.gov), search "BOTW." Enter 02-72-257528 in the **activity number** field, then click **search**. Scroll down and click on the **CO Packet** link for information about the completion of the response actions. The Site may also be seen on the map viewer, RR Sites Map. RR Sites Map can be found online at [dnr.wi.gov](http://dnr.wi.gov) by searching "RRSM." If you cannot access BOTW or RR Sites Map, please contact the DNR project manager for information regarding this Site.

If you have questions or concerns regarding the Site or this letter, please contact Matt Thompson, the DNR Project Manager, at (715) 492-2304 or [matthewa.thompson@wisconsin.gov](mailto:matthewa.thompson@wisconsin.gov).

Sincerely,

**Notes:**

NTEDC - Not To Exceed Direct Contact Residual Contaminant Level (RCL)

GW - RCL Protective of Groundwater Quality

< - Concentration below listed laboratory detection limit

GW RCL exceedences are bold

**Bold**

NTEDC RCL exceedences are outlined in bold

NS - No Standard

<sup>j</sup> - Estimated Value between detection limit and quantification limit
