Subject: Arcadia PCE Follow up BRRTS# 02-62-259051

Matt,

Just following up on our call to discuss the Arcadia PCE site. I was unable to locate a better contact number or address for the owner of the La Tapatia restaurant. Please continue attempts to gain access to the restaurant for crawl space vapor sampling. Along the lines of vapor sampling, sanitary sewer sampling along Cleveland Street may be warranted to determine if impacted shallow groundwater could create a vapor intrusion risk. Groundwater sampling should continue at the site given the evolving plume dynamics. Please continue to sample all monitoring wells and piezometers at the site for CVOCs.

Soil excavation of the source area is not practical. Another soil treatment option may need to be evaluated if the RP wants to expedite groundwater plume stability. In the past DNR representatives have requested excavation but given the likely recoverable mass of CVOC in unsaturated soils the benefit may be negligible at the site.

Please let me know if you're unable to gain access to La Tapatia, the Department can step in to attempt to gain access on your behalf.

Thanks,
Matt

We are committed to service excellence.

Visit our survey at <http://dnr.wi.gov/customersurvey> to evaluate how I did.
