Subject: **STATUS REPORT OF SITE ACTIVITIES - OCTOBER 1995**
Former Amoco Service Station No. 15567
2875 University Ave., Madison, Wisconsin (Dane Co.)
LUST Ref. # 1178
Delta No. I095-877

Dear Mr. Wojner:

Delta Environmental Consultants, Inc. (Delta) is submitting the attached *Amoco Status Report*, on behalf of Amoco Corporation, for the above referenced site.

Consulting services for this project were transferred to Delta in October 1995. Delta's review of the project file revealed that the Wisconsin Department of Natural Resources (WDNR) had requested monthly updates of project activities. Delta's review of October 1995 groundwater analytical results and historic analytical results indicate that the air sparge/soil vapor extraction (AS/SVE) system at the site has successfully remediated the site. The system is not in operation at this time. As was discussed in the November 10, 1995 meeting with Amoco, Delta, and WDNR representatives, one additional round of groundwater samples will be collected. Should groundwater analytical results remain below Enforcement Standards, a closure report will be submitted.

Given the status of the project as summarized above, Delta proposes to eliminate submittal of a monthly status report of site activities to the WDNR. A quarterly monitoring report and closure report will be submitted in accordance with the project milestones presented to the WDNR in the November 10, 1995 meeting.

If you have any questions regarding this project, please call me at (414) 789-0254 or Ray Stoelting of Amoco at (612) 896-4527.

Sincerely,

DELTA ENVIRONMENTAL CONSULTANTS, INC.
