**SUBJECT: SITE CLOSURE, Amoco Station #15567, 2875 University Av, Madison**

Dear Mr. Stoelting:

On April 17, 1996, the above mentioned site's review by the Southern District's Closure Committee was completed. This committee reviews environmental remediation cases for compliance with state laws, standards, and guidelines to maintain consistency in the closeout of cases.

Based on the correspondence and data provided, it appears that your site has been remediated to Department standards. No further investigation, remediation, or other action is required at this time.

However, your site is not yet officially closed. Before it can be, the monitoring and sparge wells at the site must all be properly abandoned according to NR-141, Wisconsin Administrative Code, *Groundwater Monitoring Well Requirements*, and any waste remaining on-site from investigation or remediation must be properly disposed of. Documentation of monitoring well abandonment and waste disposal must be submitted to the Department.

Please be aware that this letter does not absolve the current or any future owner of this property from future decisions regarding this site or impacts which may be discovered and/or traced back to past or future activities at this site. If in the future the Department receives information which demonstrates that additional work is necessary, the Department has the authority to require further action.

The Department appreciates your efforts to restore the environment at this site. If you have any questions regarding this letter, please contact me at the number below.

Sincerely,

  
 Mark Cheyne
