**Subject:** RE: CWC East Block - Third Round of Commissioning

Hi Dr. Singh,

Thank you for the update and for speaking with me today. As discussed, the DNR recommends that you submit one comprehensive commissioning report for the "3A" and "3B" commissioning events for DNR review and response, instead of two separate reports for DNR review and response. The DNR will need to consider all of the data collected from the "3A" and "3B" commissioning events for our review, therefore, submitting the commissioning information and discussion in one comprehensive report will be most efficient. Note that lab reports/data collected for the "3A" commissioning event will likely need to be submitted ahead of this comprehensive report to satisfy the notification requirements outlined in Wis. Admin. Code § NR 716.14.

Please do not hesitate to reach out if you have any questions.

Best, Jane

Hello Jane,

We have completed additional sealing measures at CWC East Block and subsequent screening in order to begin commissioning. CWC is planning to make additional improvements to the HVAC for select rooms (1054 – Fitness Room, 1055 – Women’s Lockers, 1053 – Men’s Lockers, 1049 - Storage, and North Mechanical Room). This will cause a delay in commissioning for those rooms. Therefore, we are planning to proceed with commissioning in two phases. We plan to commission the vast majority of the building,

including all residential units, in Commissioning Round 3A (which started on August 19<sup>th</sup>). After the additional HVAC improvement work is complete, we will proceed with Commissioning Round 3B for those rooms. We will prepare two reports for this round.

Please let us know if you have any questions, and thanks for your support.

Have a nice weekend,

**Pratap N. Singh, Ph.D., PE**
