Dear Mr. Sigafus:

On October 8, 2018, the South Central Regional Closure Committee reviewed your request for closure of the case described above. The Regional Closure Committee reviews environmental remediation cases for compliance with state rules and statutes to maintain consistency in the closure of these cases. The following actions are needed to complete our review of your request. Upon completion of these actions, closure approval will be provided.

Remaining Actions Needed

Monitoring Well Abandonment

The monitoring wells and piezometers at the site must be properly abandoned in accordance with ch. NR 141, Wis. Adm. Code. Documentation of well abandonment for all wells must be submitted to Erin Niemisto on Form 3300-005, found at <http://dnr.wi.gov/topic/groundwater/forms.html>.

Documentation

When the well abandonments have been completed, submit the appropriate documentation forms within 90 days of the date of this letter, to verify their completion. At that point, your closure request can be approved, and your case can be closed.

GIS Registry

Your site will be listed on the DNR Remediation and Redevelopment Program's GIS Registry, to provide public notice of remaining contamination and continuing obligations. The continuing obligations will be specified in the final closure approval. Information that was submitted with your closure request application will be included on the Bureau for Remediation and Redevelopment Tracking System (BRRTS on the Web), at <http://dnr.wi.gov/topic/Brownfields/rasm.html>.

In Conclusion

We appreciate your efforts to restore the environment at this site. This remedial action project is nearing completion. I look forward to receiving the well abandonment forms so that we may issue a case closure letter.

If you have any questions regarding this letter, please contact the project manager, Erin Niemisto, at 608-275-3224, or by email at Erin.Niemisto@wisconsin.gov .

Sincerely,
