Follow Up Flag: Follow up
Flag Status: Flagged

Erin,
That information sounds right to me. Graymont, SWLP, and DNR met to discuss their proposed dredging at the time. The predecessor of Graymont was CLM, and we were told by them that dredging occurred in 1990 and 1975. Those were the projects I was hoping to learn more about. I assume a DNR permit was needed in 1990, but maybe not in 1975? If we knew which contractor(s) did the work, I could check with them to see if there are any records available.
Thanx,
Bill

Subject: Dredging by Graymont

Hello Bill –

I checked with both Steve LaValley and Jamie Dunn regarding dredging of the slip by Graymont. Apparently the Department was approached regarding dredging about five years ago or so, but they did not end up applying for a permit. They did not follow through with dredging because of their concern regarding contaminants in the slip. Jamie stated that he was not aware of any dredging being done in the slip during his time as project manager. Please let me know if you have any questions. Thanks!

Subject: RE: SWL&P Question

The slip at the discharge from the MGP has not been dredged in years (not since I have had the project). They wanted to but did not follow through due to the contamination.

Subject: SWL&P Question

Hello Jamie –

I'm trying to track down information about dredging in the slip adjacent to SWL&P. I spoke with Steve LaValley in the Superior office, and he thought that Graymont had dredged the slip about 5 years ago. He believed there was some sampling done by Graymont, that he might have required as part of the permit requirements for dredging. He can't locate any file information, though. Do you have any information or recollection of this dredging event, or other past dredging in that slip? I didn't see anything in the RR file about past dredging activity or sampling that may have been done associated with planned dredging. Please let me know. Thanks!
