Tim,

Due to our current mission of assisting the Afghan Refugees, there was need to move one of the tactical vehicle storage lots. The selected location is on top of former Landfill #7 (BRRTS No. 02-42-279996). The actual footprint of the former landfill is not known. The area on top of and surrounding Landfill #7 was formerly used as a Cannibalization Yard, essentially a recycling facility (like a wrecking yard) that provided parts for repairing tactical vehicles (see attached map). The Cannibalization Yard was removed a couple of years ago and the area has been essentially a vacant lot.

To prepare the location for moving the tactical vehicle storage area, regrading was performed over of much of the area. Based upon the attached map, and the fact that the actual landfill footprint is uncertain, some of the regrading may have included part of the soil/gravel cap over the landfill. The attached map has outlined the approximate regrading area in black. The red line represents the fence (which is actually straight) around the north and east sides of the area. On the east side, the graded area extends to the outer line (fence). The inner fence is not currently present. No waste was exposed during the regrading activities.

The attached photos show the area. Please let me know if you have any questions.
