Subject: Hayton Area Remediation Project (HARP) Operable Unit 4/Upper Closure Documentation Sampling Results Report, December 2018

Dear Ms. Williamson:

Thank you for submitting the above referenced report. Pursuant to the November 2018 Negotiated Agreement, entered into between the Department of Natural Resources (Department), Tecumseh Products Company and TRC, the Department has reviewed the report and agrees that the monitoring results qualify for the Tier One criteria of the Three Tier Closure Process in the Negotiated Agreement Exhibit D.

The Department is granting a Wis. Admin. Code ch. 708 No Further Action determination for HARP Operable Unit 4 (OU4) Upper, located in and near The City of New Holstein, Calumet County, Wisconsin. Based on the information available at this time, the Department has determined that the interim removal action is completed and that no further soil and sediment remediation is anticipated for OU4/Upper at this time, consistent with the Negotiated Agreement.

TRC and Tecumseh remain subject to the terms of the 2018 Negotiated Agreement and final Department review, approval, and case closure for the site pursuant to Wis. Admin. Code chs. NR 725 & 726.

Sincerely,

Darsi Foss, Director
Remediation and Redevelopment Program

Ecc: Chris Harvey, TRC
Jason Smith, Tecumseh Products
