Subject: Ladysmith SVE system - July 1 Contingency Visit - VFD problem

Carrie.

I met with electrician at Ladysmith SVE system. We determined the VFD (variable frequency drive) appears to be damaged (see melted material in attached pictures). I am in contact with the vendor and will determine what is needed to fix the problem.

Meanwhile, we will evaluate remediation at Dougs and Autostop in light of the few months remaining in PECFA.

Talk with you soon.

Quote attached.

Installation will require installing the drive as well as doing setup/programming of the drive. If your electrician has installed drives before then this shouldn't be a problem. The setup/menus might be a little different from different mfg's so plan on consulting the VFD manual.

Thanks Evan.

Can you send me a Cost Estimate on your letterhead so that I can forward on for approval. Please include ALL costs (e.g., shipping, etc.).

I assume our electrician can install?

Thanks

TECO said that looks like a blown capacitor. The N3 drive you have was discontinued. Replacement drive and dimensions are quoted below. The replacement drive does have a "knob" (potentiometer) for adjusting speed. Also comes with a bracket for door mounting if you want.

Here are the dim of the current F510 that is in the field:

11.81H X 8.27W X 8.46D

The dimensions of the EQ7-2010-C that we suggest:

10.24H X 8.66W X 7.68D

EQ7-2010-C	TECO 10HP 230V DRIVE	\$1177.00 each	factory stock TX
EQ7-3S	3' CORD	\$50.00 each	factory stock TX

There is no "Keypad holder"; it comes with a kit already to mount the keypad externally.

Evan.
C: Gary Gilbert (Project Engineer)
Ziegler Electric

The SVE system in Ladysmith stopped working a couple weeks ago. I stopped by and noticed power to the panel, light turns on inside trailer, panel fan running, Power light ON, SVE switch set to AUTO and green....but VFD display did not show anything.

I met with electrician (Ziegler Electric) this morning and we took off VFD panel and noticed melted "stuff" (see pictures).

Evan: Any suggestions? Assuming the VFD is fried and needs to be replaced, we will need to figure out a plan (and cost). What might have caused this? Blower problem? Can you call me to discuss? (I am busy Tuesday until after lunch... perhaps we can set up a telephone appt).

Thanks
