Subject: RE: Auto Stop -APPROVAL!

Carrie.

I was thinking we might want to add sampling of the extraction wells... RW-1, -2, -3, -4, -5, EX-2, -4, -5, M-1...total change of 9 additional samples.

This is likely the last time PECFA pays for ground water sampling...would be good to get data from these wells.

I will discuss with you Monday.

Thanks

Ken shimko

Attachments: Cost change due to sampling change.pdf

Oh, yeah, one other change.

MW-11 is on the south side of Autostop. It is at least 5 feet below grade so I adjusted the well depth to 55 feet (instead of 60 ft) to keep the screens at similar depths. This reduced costs as well (see attached spreadsheets).

Subject: Autostop - change in drilling

Carrie.

This note follows my phone calls this week in which we discussed the drilling at the Autostop site.

We planned to drill and sample 4 piezometers (to 60 feet each). However, during drilling, we encountered "blow-up" in the augers in two of the borings which prevented sampling. Therefore we should change the invoicing from "*Drilling with sampling*" to "*Drilling without sampling*". This is a minor change which actually reduces cost (by \$1450.78 – see attached worksheets).

Please approve this change. I think a simple email response would be adequate.

Thanks
