RE: **Site Investigation Report Directives**

DNR BRRTS # 02-07-282564 PECFA # 54893-8024-14
Burnett Oil Co
26504 Minnow Avenue, Webster

Dear Mr. Ehalt:

On March 22, 2017, the Wisconsin Department of Natural Resources (Department) received the Environmental Site Investigation Report for the site referenced above. The Department has determined the site investigation has not defined the degree and extent of contamination consistent with the requirements of NR 716 Wis. Admin. Code.

Additional soil borings are needed to define the degree and extent of the petroleum contaminated soil

Petroleum product impacts to groundwater by petroleum compounds appear to be minimal. Groundwater data collected to date for this project shows that shallow soil contamination is the main driver of this petroleum cleanup project. It appears groundwater should be further assessed using direct push technology groundwater grab samples. Please submit a costs estimate for Department review of PECFA reimbursement of costs associated with the above tasks.

Thank you for your efforts to protect Wisconsin's environment. If you have any questions, please contact me in writing at the letterhead address or by telephone at (608) 261-6543.

Sincerely,

Ralph N. Smith
Hydrogeologist
