SUBJECT: *Closure of WDNR LUST Case # 71-01848*
Oshkosh Truck - Testing & Development, 324 W. 29th, Oshkosh

Dear Don:

The Department's Case Closeout Committee in the Lake Michigan District has completed a review of the above referenced petroleum contamination case. This panel reviews environmental remediation cases for compliance with state laws, standards, and guidelines to maintain consistency in the closeout of cases. It appears that actions have been taken to the extent practicable to restore the environment and minimize the harmful effects from this discharge to the air, lands and waters of this state. At this time, *your site has been granted closure.*

Based on the information available, the Department is not requiring any further investigation or other action concerning this specific site. However, if additional information in the future indicates that further investigation or cleanup is warranted, the Department will require appropriate action to be taken at that time.

The Department appreciates the cooperation you have shown in this matter. Your concern for your property and the environment is commendable.

Sincerely,

Kathleen M. Sylvester, Hydrogeologist
Leaking Underground Storage Tank Program
